SAMPLE DEVELOPMENT V5

Everyday objects, Odisha stories

The first Project Odisha merchandise development batch brings the existing four-product collection under the name you selected: Project Odisha. The sample scope and visuals below remain candidates for review.

New concept board. AI-generated product visual, not a photograph of manufactured samples. Use the specifications for proposed construction, not image measurements.

Recommended first sampling step

Cost a T-shirt with front/back decoration and one Story Cup. In parallel, request Tasar swatches and a construction sample before committing to a decorated bag. Assess bottle blanks and decoration separately. This is a sequence recommendation, not an order.

SAMPLE DEVELOPMENT V5

One brand, consistent artwork

Current name	PROJECT ODISHA on the new merchandise.
Earlier assets	UTKAL mockups and lettering are historical references, not current brand artwork.
Design language	Book-and-boat emblem, maritime story, sea blue, laterite, straw and ivory.
Shared story	One selected flat sailing illustration reused at each product size. Riverbank art is a separate later master.
Type status	New live-text SVG lockups are editable review candidates. Outline lettering after type and size approval.
Meaning	An imaginative maritime remembrance and exchange story. No identified voyage, vessel or historical reconstruction is claimed.

Artwork handover that still needs work

A mockup redraws details differently across products. Do not trace its lettering or send it as a print master. The selected composition must receive clean flat artwork, product-specific placement, supplier process advice and an actual-size proof. Story-art attempts with soft edges remain held outside the supplier pack.

Colour references: sea blue #1D4658, laterite #91462F, straw #C1A263, ivory #F2E6D0. These RGB references do not establish a physical dye, Pantone equivalent, ink separation or exact match on Tasar.

Included: sea and ivory SVG lockups, the Source Serif 4 font and its OFL licence. The common emblem geometry comes from the existing native vector artwork. Brand name approval does not approve this particular lockup.

SAMPLE DEVELOPMENT V5

Project Odisha T-shirt

UTS-TS-001 - proposed sample specification. Quantities, dimensions and materials below are targets for supplier confirmation.

Base and construction	Relaxed crew neck; 100% combed cotton; 220 GSM; sizes S-XXL. These are quote targets, not selected stock.
Finish / colours	Black - confirmed by Founder
Brand and placement	240 x 260 mm front envelope retained for fit review. Use Project Odisha book-and-boat lockup. Back: same brand above shared sailing art, maximum 280 x 330 mm proposed. Confirm actual size grading and collar/hem clearances.
Process to evaluate	Quote front and back decoration separately. Assess soft-hand silk-screen or compatible short-run process, fine story detail, underbase and wash/rub durability.
Supplier evidence	Blank SKU, composition/GSM evidence, size chart, shrinkage, wash/rub result, actual print box and unit costs.
Sample request	One M decorated sample is the existing proposal, not a confirmed size/order. Quote front and back separately, provide fit chart and fabric/colour swatches.

Release gate: actual supplier template, revised proof, physical sample result, complete costs and Founder selection. No price, stock, delivery date or performance claim is established by this sheet.

SAMPLE DEVELOPMENT V5

Project Odisha Tasar Jhula

UTS-BG-001 - proposed sample specification. Quantities, dimensions and materials below are targets for supplier confirmation.

Base and construction	Founder selected Tasar silk outer. Current new-brand board shows the long natural pouch option. Proposed cotton lining and hidden reinforcement. Do not substitute cotton/blend outer without a separate decision.
Finish / colours	Long option: body 320 x 430 mm, continuous strap 1050-1150 x about 50 mm, loop/button closure. Retained two-handle alternative: body 380 x 420 mm, 80 mm gusset, 650 mm handles. Terracotta/sea-blue colours remain alternatives.
Brand and placement	PROJECT ODISHA above the shared sailing story. Initial art envelope up to 280 x 300 mm. Refit after silhouette, seams, closure and print method are selected. Reverse blank is only a proposal.
Process to evaluate	Test decoration on the actual selected natural or dyed Tasar. Confirm ink compatibility, opacity where needed, colourfastness, fine detail, curing and care. Final artwork and process separation remain pending.
Supplier evidence	Tasar fibre composition, fabric provenance, separate lining/handle materials, fabric weight, seams, handle-load test, colourfastness, print rub/cleaning results and costs.
Sample request	First request actual Tasar swatches and one lined construction sample for the selected silhouette. Decorated sample follows process compatibility and flat-art proof. Load and strap comfort must be sampled.

Release gate: actual supplier template, revised proof, physical sample result, complete costs and Founder selection. No price, stock, delivery date or performance claim is established by this sheet.

SAMPLE DEVELOPMENT V5

Project Odisha Story Cup

UTS-CP-001 - proposed sample specification. Quantities, dimensions and materials below are targets for supplier confirmation.

Base and construction	330 ml ceramic mug; straight-sided blank preferred for the story wrap. Supplier confirms actual capacity and dimensions.
Finish / colours	Ivory body; sea-blue handle/interior - proposed
Brand and placement	200 x 85 mm preliminary graphical story wrap with PROJECT ODISHA. No narrative paragraph. Old 72 mm UTKAL wordmark width does not transfer automatically to the longer new name. Refit to the actual blank and handle exclusion zone.
Process to evaluate	Ask for full-colour ceramic transfer/decal sampling compatible with the chosen blank. This detailed illustration is raster artwork, not a three-spot-colour design.
Supplier evidence	Capacity, diameter/height, full printable template, handle clearance, glaze/decoration process, colour swatches and supported care/contact-use documentation.
Sample request	One decorated sample proposed after selecting the actual blank/template. Inspect wrap continuity, brand legibility, handle clearance, colour and packaging.

Release gate: actual supplier template, revised proof, physical sample result, complete costs and Founder selection. No price, stock, delivery date or performance claim is established by this sheet.

SAMPLE DEVELOPMENT V5

Project Odisha Water Bottle

UTS-WB-001 - proposed sample specification. Quantities, dimensions and materials below are targets for supplier confirmation.

Base and construction	Premium 750 ml target: double-wall vacuum-insulated stainless steel, SS 304 inner wall, wide-mouth screw cap, integrated carry loop and replaceable seal. Supplier blank and performance remain unverified.
Finish / colours	Matte black and Nila Sagara blue - both retained by Founder
Brand and placement	70 x 150 mm preliminary front panel on black and sea-blue blanks. Book-and-boat emblem with PROJECT ODISHA below. Refit to the actual blank, cap and curvature. No wrap supplied.
Process to evaluate	Ask for a multi-colour screen/transfer method compatible with the coating. Confirm smallest gaps, colour registration and abrasion durability.
Supplier evidence	Actual capacity/weight, steel grade evidence, insulation test conditions/results, leak/loop-load tests, coating abrasion, printable template, replacement seals/lids and warranty.
Sample request	One decorated sample in each colour proposed. Compare cap/loop, cleaning access, seal, insulation, finish and print; Founder approves costs before ordering.

Release gate: actual supplier template, revised proof, physical sample result, complete costs and Founder selection. No price, stock, delivery date or performance claim is established by this sheet.

SAMPLE DEVELOPMENT V5

Supplier quote request - unsent

Use one comparable response per product. Request Bangalore sourcing as previously directed, while recording the actual manufacturer and material origin. Quote bands are comparisons, not quantities ordered.

Supplier and blank	Company, manufacturing/source role, blank SKU, composition, material evidence, available colours/sizes and actual dimensions.
Artwork and method	Printable template, limitations, minimum lines/gaps, base opacity, colour method, sample proof and decoration location.
Separate cost lines	Sample, setup, artwork/separation, blank, decoration, packaging, tax and delivery. Quotes at 25 / 50 / 100 units with currency and validity.
Timing and fulfilment	MOQ, sample and production lead time, pickup/dispatch capability, packing, tracking, return location and ownership of work.
Quality and remedy	Relevant supporting test/care evidence, sample acceptance, defects, reprint/replacement terms and what the quote excludes.
Bag-specific question	Tasar fibre composition and provenance, dyed/natural options, separate lining/strap materials and silk-compatible decoration.

The included JSON response template uses blank values for unknown costs and capabilities. No supplier has received this request and none is appointed. Do not use old v1/v3 bag or blank-back T-shirt sheets as the current instructions.

Sample review and release record

All samples	Compare against the exact approved proof. Record supplier, blank SKU, sample date, measurements, defects, photographs and disposition.
T-shirt	Fit and grading, front/back placement, print feel, opacity, detail and relevant wash/rub/shrinkage observations. Agree the test method and acceptance before testing.
Tasar jhula	Composition/provenance evidence, lining, seams, reinforcement, strap/drop comfort, closure, relevant load test, dye/print rubbing and care.
Story Cup	Actual capacity, print coverage, handle gap, seam continuity, glaze/decorated-use evidence, cleaning claims and protective packaging.
Water bottle	Actual capacity/weight, cap/seal/loop, relevant leak and insulation test conditions, coating/print abrasion, spares and supported care/warranty.
Disposition	Accept for specified use, revise/resample, or reject. Record who decided, exact revision and unresolved limitations. No passing result is prefilled.

A sample visual is not evidence of a material or performance. Supplier claims, supplied documentation, direct observations and any competent specialist review remain separately identified. Use relevant methods for the chosen blank and process.

Costing and next production step

Per-variant cost	Blank + decoration + packaging + allocated setup + inbound freight + applicable non-recoverable costs. Preserve tax basis.
Per-channel cost	Add actual gateway/marketplace cost, outbound fulfilment, discounts, returns/damage allowance and support effort.
Cash before sales	Samples, initial quantities, deposits, working capital, replacements and refund exposure. Name the payer and cash ceiling.
Inventory	Separate saleable variants and channel allocations. Four product types do not imply only four SKUs.
Next concrete deliverable	Selected visual/lockup, chosen bag silhouette, real blank templates, comparable quotes and a revised sample cost sheet.
After sample acceptance	Approved product facts and real photographs, price/policies, dispatch responsibility, limited quantity and separate launch decision.

Source and decision basis

Founder: "Use Project Odisha", 15 October 2026. Reuses Store shared-story v4, sample specifications v4, long Tasar refinement, commerce plan and prior product sheets only where not superseded. Exact source paths, source checksums, image prompts and output manifests accompany the pack.

Creative direction and accountable human: Ahimanikya Satapathy. AI-assisted design and documentation. Local preparation only. This pack creates no supplier contact, sample order, payment, sale or website publication.
