About Odia Dhaga

ଦୂରେ ଥାଇ ମଧ୍ୟ ଭିତରେ ରହିଥିବା ଭାଷା

The language that stays within us

ମୁଁ ପଞ୍ଚତିରିଶ ବର୍ଷ ହେଲା ଓଡ଼ିଶା ବାହାରେ ରହୁଛି| ତଥାପି ଓଡ଼ିଆ ଭାଷା ଓ ତାହା ସହ ଜଡ଼ିତ ଜୀବନବୋଧ ମୋତେ ଛାଡ଼ି ଯାଇନାହିଁ| ମନେ ରଖିବାକୁ ଅଲଗା ଚେଷ୍ଟା ନ କଲେ ବି ସେହି ଭାଷା ମୋ ଭିତରେ ରହିଛି| ମୋ ପାଇଁ ଢଗଢମାଳି ସେହି ସମ୍ପର୍କର ଏକ ଅଂଶ| ଜାଗା ବଦଳିଛି; କଥାକୁ ବୁଝିବାର କେତେକ ଢଙ୍ଗ ସାଙ୍ଗରେ ରହିଯାଇଛି|

I have lived outside Odisha for thirty-five years. Yet the language, and the way of life it carries, have never left me. They remain within me even without a deliberate effort to hold on to them. Dhaga–dhamali are part of that connection. The place has changed; some of the ways I understand life have travelled with me.

ଭାଷା କେବଳ ଶବ୍ଦ ଓ ବ୍ୟାକରଣରେ ସୀମିତ ନୁହେଁ| କେଉଁ କଥାରେ ହସ ଲାଗେ, କେବେ ମନ ଦୁଃଖ ହୁଏ, କାହାକୁ କିପରି ବୁଝାଇବା ଓ କେବେ ନିଜକୁ ଅଟକାଇବା—ସେସବୁରେ ମଧ୍ୟ ଭାଷା ରହେ| ଏହି ବହିରେ ମୁଁ ସେହି ଜୀବନ ସହ ଢଗର ସମ୍ପର୍କକୁ ଦେଖିବାକୁ ଚାହୁଁଛି|

Language reaches beyond words and grammar. It enters what makes us laugh, what hurts, how we reason with another person and when we check ourselves. This book looks at the connection between a saying and that lived experience.

ଚିହ୍ନା ଚିତ୍ରରେ ଚିନ୍ତାର ନୂଆ ଦିଗ

Familiar pictures that change how we think

“ଅତି ଲେମ୍ବୁ ଚିପୁଡ଼ିଲେ ପିତା” କହିଲେ ଆଖି ଆଗରେ ଲେମ୍ବୁ ଚିପୁଡ଼ିବାର ଚିତ୍ର ଆସେ| ତାହା ସହ ଗୋଟିଏ ପ୍ରଶ୍ନ ମଧ୍ୟ ଆସେ: ଯାହା ଭଲ ଫଳ ଦେଉଛି, ତାକୁ ଆଉ କେତେ ଟାଣିବି? କାହାର ସାହାଯ୍ୟ ପାଇସାରି ପୁଣିପୁଣି ଅଧିକ ମାଗିବା ବେଳେ ଏହି କଥା ଆମକୁ ଅଟକାଇପାରେ| ଲେମ୍ବୁର ଚିତ୍ର ଏଠି ସମ୍ପର୍କରେ କେଉଁଠି ଅଟକିବା ଦରକାର, ତାହା ବୁଝାଏ| [1]

“ଅତି ଲେମ୍ବୁ ଚିପୁଡ଼ିଲେ ପିତା” brings the action of squeezing a lemon to mind. It also prompts a question: how far should I press something that is already giving a useful result? After someone has helped us, repeatedly asking for more may call for this reminder. The kitchen image becomes a way to think about proportion in a relationship. [1]

“ଗରଜିଲା ମେଘ ବରଷେ ନାହିଁ” ଶୁଣିଲେ ବଡ଼ କଥା ଓ ପ୍ରକୃତ କାମକୁ ଅଲଗା କରି ଦେଖିବାକୁ ମନ ଯାଏ| ଏହା ପାଗର ନିୟମ ନୁହେଁ| କଥା ଦେଇଥିବା ଲୋକ ଆସଲେ କଣ କଲେ, ସେଥିପ୍ରତି ଧ୍ୟାନ ଦେବାର ଏକ ଢଙ୍ଗ| ଢଗର ମୂଲ୍ୟ ଏହି ମୋଡ଼ରେ—ଚିହ୍ନା ଜିନିଷ ଦେଇ ସାମ୍ନାର ପରିସ୍ଥିତିକୁ ଆଉ ଥରେ ଦେଖିବା| [1]

“ଗରଜିଲା ମେଘ ବରଷେ ନାହିଁ” turns attention from loud words to what someone actually does. It is not a rule about the weather. The familiar cloud supplies a different angle from which to examine a promise. That turn of thought is one of the pleasures of a Dhaga. [1]

ମଣିଷଙ୍କ ମଝିରେ କଥାର ଅର୍ଥ

Meaning grows between people

ଏକେ ଢଗ କହିବାର ଢଙ୍ଗ ବଦଳିଲେ ତାହାର ପ୍ରଭାବ ବଦଳେ| ହସି କହିଲେ ହାଲୁକା ଟିପ୍ପଣୀ ହୋଇପାରେ; ରାଗରେ କହିଲେ ତାହା ଆଘାତ ଦେଇପାରେ| କିଏ କାହାକୁ, କେଉଁ ଅବସରରେ କହୁଛି, ସେଥିକୁ ବାଦ ଦେଲେ କେବଳ ଶବ୍ଦର ଅର୍ଥ ରହିଯାଏ| ଓଡ଼ିଆ ଶିଖୁଥିବା ଜଣେ ପାଠକଙ୍କ ପାଇଁ ଏହି ପ୍ରସଙ୍ଗ ବୁଝିବା ମଧ୍ୟ ଭାଷାର ନିକଟତର ହେବା|

The same saying can feel different when its tone changes. Said lightly, it may be a teasing reminder; said in anger, it may wound. Who speaks, to whom, and on what occasion belongs to the meaning. For a reader learning Odia, understanding that setting offers a closer encounter with the language people live with.

“କହି ଦେଉଥାଇ ପରକୁ, ବୁଦ୍ଧି ନ ଦିଶଇ ଘରକୁ” ଅନ୍ୟକୁ ଉପଦେଶ ଦେବା ଆଗରୁ ନିଜ ଆଚରଣକୁ ଦେଖିବାର ସୁଯୋଗ ଦିଏ| ଢଗକୁ କେବଳ ଅନ୍ୟର ଭୁଲ ଧରିବା ପାଇଁ ବ୍ୟବହାର କଲେ ଏହି ସୁଯୋଗ ହରାଇଯାଏ| କେବେକେବେ ତାହାର ସବୁଠାରୁ ଭଲ ଶ୍ରୋତା ଆମେ ନିଜେ| [1]

“କହି ଦେଉଥାଇ ପରକୁ, ବୁଦ୍ଧି ନ ଦିଶଇ ଘରକୁ” invites us to examine our conduct before advising somebody else. If sayings are used only to catch other people out, that possibility is lost. Sometimes we are their most useful audience. [1]

ପୁରୁଣା ସାକ୍ଷ୍ୟ, ଚାଲୁଥିବା ଜୀବନ

Older witnesses, continuing life

ଏହି କଥାମାନଙ୍କର ଲିଖିତ ସାକ୍ଷ୍ୟ ମଧ୍ୟ ଅଛି| ୧୮୯୩ ମସିହାର “ଢଗମାଳିକା, ପ୍ରଥମଭାଗ” କଟକର ଭିକ୍ଟୋରିଆ ପ୍ରେସରେ ଛପା ହୋଇଥିଲା; ମୁଖପୃଷ୍ଠାରେ ଗୋବିନ୍ଦ ରଥଙ୍କ ନାମ ପ୍ରକାଶକ ଭାବେ ଅଛି| ସେହି ବହିରେ ଲେମ୍ବୁ ଢଗର ଏକ ରୂପ ମିଳେ| ଏଥିରୁ କଥାଟି ସେତେବେଳେ ଲେଖାରେ ଥିଲା ବୋଲି ଜଣାଯାଏ; ପ୍ରଥମେ କିଏ ବା କେବେ କହିଥିଲେ, ତାହା ଜଣାଯାଏ ନାହିଁ| [2]

These expressions also have a printed history. The title page of ଢଗମାଳିକା, ପ୍ରଥମଭାଗ identifies Gobinda Rath as publisher and Victoria Press, Cuttack, 1893. A version of the lemon saying appears in that volume. This establishes a written witness by that date; it does not establish who first said it or when it began. [2]

ପୁରୁଣା ବହିରେ ମିଳିବା ଏକ ପ୍ରକାର ସାକ୍ଷ୍ୟ; ଆଜି କେଉଁ ପରିସ୍ଥିତିରେ ଆମେ ତାକୁ ବୁଝୁଛୁ, ସେ ଆଉ ଏକ କଥା| ଏହି ସଂଗ୍ରହରେ ମୂଳ ଉକ୍ତି, ତାହାର ଭିନ୍ନ ରୂପ ଓ ଆମର ବ୍ୟାଖ୍ୟାକୁ ଅଲଗା ରଖାଯାଇଛି| ସବୁ ଉକ୍ତି ଏକେ ପ୍ରକାରର ନୁହେଁ—କେତେକ ପୂର୍ଣ୍ଣ ପ୍ରବାଦ, କେତେକ ଛନ୍ଦମୟ କଥା, ଆଉ କେତେକ ରୂଢ଼ି|

Finding a saying in an old book is one kind of evidence; understanding its possible use today is another. This collection distinguishes the wording, its variants and our interpretation. The entries also differ in form: some are complete proverbs, some rhymed sayings, and some idiomatic expressions.

କଥାରୁ କଥା, ଜୀବନରୁ ଶିଖିବା

Learning through conversation

ପିଲାଙ୍କୁ ଢଗ ସହ ପରିଚିତ କରାଇବା ପାଇଁ ପ୍ରଥମେ ମୁଖସ୍ଥ କରାଇବା ଦରକାର ନାହିଁ| ଦୈନନ୍ଦିନ କୌଣସି ଘଟଣା ସହ ମେଳ ଖାଉଥିବା ଏକ ସହଜ ଢଗ କହି ତାହା ଶୁଣି କେଉଁ ଚିତ୍ର ମନକୁ ଆସୁଛି ବୋଲି ପଚାରିପାରିବା: ଲେମ୍ବୁକୁ ଅଧିକ ଚିପୁଡ଼ିଲେ କଣ ଭାବ ମନକୁ ଆସୁଛି? ଏହି କଥା ଆଉ କେଉଁଠି ଲାଗିପାରେ? କେଉଁ ପରିସ୍ଥିତିରେ ଏହା ଠିକ୍ ହେବ ନାହିଁ? ପିଲାର ନିଜ ଉଦାହରଣ ଓ ପ୍ରଶ୍ନ ପାଇଁ ଜାଗା ରହୁ|

Children need not begin by memorising a list. We can introduce a simple saying when an ordinary event gives it a setting, then ask what picture it brings to mind. Where else might it fit? When might it fail? Leave room for the child's own example and objection. These are invitations to a conversation, not a test.

ଘରେ କେହି ଏହି କଥାକୁ ଅନ୍ୟ ଭାବେ କହୁଥିଲେ, ସେହି ରୂପଟି ମଧ୍ୟ ଶୁଣିବା| ମନେ ଥିବା ଉଚ୍ଚାରଣ, ଲୟ ଓ କହିବାର ଅବସରକୁ ଲେଖି ରଖିପାରିବା| ଓଡ଼ିଆ ନୂଆ ଶିଖୁଥିବା ବୟସ୍କ ବ୍ୟକ୍ତି ମଧ୍ୟ ଏଭଳି ଆରମ୍ଭ କରିପାରନ୍ତି| ଅନୁବାଦ ଅର୍ଥର ଦୁଆର ଖୋଲିଦେବ; ମୂଳ କଥାଟି ଶୁଣିବା ଓ ତାହାର ବ୍ୟବହାର ବୁଝିବା ସେହି ଅର୍ଥକୁ ଆହୁରି ଜୀବନ୍ତ କରିବ|

If someone at home knows another version, listen to it too. Its pronunciation, rhythm and remembered occasion can be worth recording. Adults beginning Odia can approach it in the same spirit. Translation opens a door to the meaning; hearing the expression and understanding its use gives that meaning a fuller life.

ବୁଝି ରଖିବା, ବିଚାର କରି ବ୍ୟବହାର କରିବା

Carry it forward with judgement

ପୁରୁଣା କଥା ହେଲେ ବୋଲି ସବୁ ଉକ୍ତିକୁ ଜୀବନର ନିୟମ କରିହେବ ନାହିଁ| କେତେକ ଢଗରେ ଅପମାନ, ପକ୍ଷପାତ ବା ହିଂସାର ଛାୟା ଅଛି| ସେଗୁଡ଼ିକୁ ବୁଝିବା ସହିତ ପ୍ରଶ୍ନ ମଧ୍ୟ କରିବା ଦରକାର| କାହାକୁ ହେୟ କରିବାର ଅନୁମତି ଭାବେ ତାହାକୁ ନେବା ଉଚିତ ନୁହେଁ| ଯାହା ଆମକୁ ଧୈର୍ଯ୍ୟ, ପରିମାଣ, ସହଯୋଗ ବା ଆତ୍ମବିଚାରର ସୁଯୋଗ ଦିଏ, ତାହାକୁ ଆଜିର ଜୀବନରେ ବିଚାର କରି ବ୍ୟବହାର କରିପାରିବା|

Age does not make every saying a rule to live by. Some contain insults, prejudice or images of violence. Understanding them includes questioning them; remembering an expression does not give us permission to demean someone. We can draw thoughtfully on those that help us consider patience, proportion, cooperation or our own conduct.

ମୋ ପାଇଁ ଏହି ସମ୍ପର୍କ ଦୂରତାରେ ଶେଷ ହୋଇନାହିଁ| ଢଗକୁ ପୁଣି ପଢ଼ିବା ମାନେ କେବଳ ପୁରୁଣା ଶବ୍ଦ ଉଦ୍ଧାର କରିବା ନୁହେଁ; ନିଜ ଭିତରେ ଚାଲୁଥିବା ଏକ କଥାବାର୍ତ୍ତାକୁ ଶୁଣିବା| ସେହି କଥାବାର୍ତ୍ତାରେ ଆଉ ଜଣେ ସାମିଲ ହେଲେ ଭାଷା ମଧ୍ୟ ନୂଆ ଜୀବନ ପାଏ|

For me, distance has not ended this connection. Returning to these sayings means hearing a conversation that is still going on within me. When somebody else joins that conversation, the language finds another place to live.

କହି ଦେଉଥାଇ ପରକୁ, ବୁଦ୍ଧି ନ ଦିଶଇ ଘରକୁ

Advice that stops at the doorstep

ଅନ୍ୟକୁ ଭଲ ପରାମର୍ଶ ଦେବା ସହଜ, ନିଜ ଜୀବନରେ ସେହି କଥା ମାନିବା କଷ୍ଟକର ହୋଇପାରେ| ଉପଦେଶ ଓ ନିଜ ଆଚରଣ ମଧ୍ୟର ଏହି ଫାଙ୍କକୁ କଥାଟି ଟିପ୍ପଣୀ କରେ| କହୁଥିବା ଲୋକ ନିଜେ ଭୁଲ୍ କରନ୍ତି ବୋଲି ପରାମର୍ଶଟି ଅବଶ୍ୟ ଭୁଲ୍ ହେବ, ଏମିତି ନୁହେଁ|

Literal meaning

One keeps advising others, but wisdom is not seen at home.

Meaning

The criticism is the gap between giving advice and practising it. The outward-facing adviser appears wise, yet fails to apply that wisdom to their own affairs. The saying invites self-examination; it does not imply that advice is worthless whenever its giver has difficulties.

An example · original

A person lectures everyone about keeping accounts but repeatedly loses track of their own spending. A relative uses this line to point out the inconsistency. (New editorial example, not a collected quotation.)

In context

The rhyme of ପରକୁ and ଘରକୁ reinforces the contrast between others and home. Here the structure is part of the saying’s force, not just decoration.

Words & appearances · Dhaga 007

ଗରଜିଲା ମେଘ ବରଷେ ନାହିଁ

Noise is not the same as action

ମେଘର ଗର୍ଜନ ବଡ଼, କିନ୍ତୁ ବର୍ଷାର ଦେଖା ନାହିଁ—ଏହି ଉଫାଟକୁ ମଣିଷର କଥା ଓ କାମ ସହ ମେଳାଯାଇଛି| ବହୁତ ଘୋଷଣା ବା ଧମକ ଥାଇ କାମରେ କିଛି ନଦିଶିଲେ ଏହା କୁହାଯାଏ| ଗର୍ଜନର ଚିତ୍ରଟି ବ୍ୟଙ୍ଗକୁ ଜୋର୍ ଦିଏ; ସବୁ ମେଘ ବିଷୟରେ ନିୟମ ଦେଉନାହିଁ|

Literal meaning

The cloud that thunders does not rain.

Meaning

The contrast between loud thunder and absent rain is used to question bluster: impressive promises or threats do not necessarily lead to action. Read the sentence figuratively. Thunderstorms can, of course, bring rain; the proverb is not a dependable weather rule.

An example · original

Someone loudly promises to repair a shared bench, but nothing happens. Others use the saying to ask for action rather than another announcement. (New editorial example, not a collected quotation.)

In context

Weather becomes a way of talking about human speech. Similar imagery elsewhere would not by itself prove where this Odia wording originated.

Thunder fills the air; the bowl stays empty. An illustration of noise without results.

Imagined shop scene: praise does not replace careful judgment.

Words & appearances · Dhaga 013

ଅତି ଭକ୍ତି ଚୋର ଲକ୍ଷଣ |

When praise becomes suspicious

ଅସାଧାରଣ ଭାବେ ଭକ୍ତି ବା ବିନୟ ଦେଖାଇବା ପଛରେ ଅନ୍ୟ ଉଦ୍ଦେଶ୍ୟ ଥାଇପାରେ ବୋଲି ଏହି କଥା ସନ୍ଦେହ ପ୍ରକାଶ କରେ| ଚାଟୁକାରିତାରେ ଭୋଳି ନଯାଇ କାମ ଓ ଉଦ୍ଦେଶ୍ୟକୁ ଦେଖିବା ଏଠାରେ ମୁଖ୍ୟ| ଭକ୍ତି ବା ଭଦ୍ରତା ନିଜେ ଚୋରିର ପ୍ରମାଣ ନୁହେଁ|

Literal meaning

Excessive devotion is a thief's sign.

Meaning

Exaggerated displays of devotion or deference can invite suspicion that the speaker wants something. In everyday use the warning can concern flattery, not only religious devotion. The force comes from the deliberately sharp word "thief"; the saying itself is not evidence that a particular admirer is dishonest.

An example · original

A stranger showers a shopkeeper with praise and then asks to take goods away without paying. The shopkeeper recalls this saying and checks the request carefully. (New editorial example, not a collected quotation.)

In context

ଭକ୍ତି supplies the outward appearance of reverence, while ଚୋର supplies the hidden motive in the proverb's contrast. Interpretation depends on the conversation; sincere devotion is not being classified as theft.

କାଚ, କାଚ, ମଣି, ମଣି, କିଣା ବିକା ବେଳେ ଜଣା ଜଣି

Value put to the test

କାଚ ଓ ମଣି ଦେଖିବାକୁ ଏକା ଭଳି ଲାଗିଲେ ବି ସେମାନଙ୍କର ମୂଲ୍ୟ ଏକ ନୁହେଁ| ପ୍ରକୃତ କାମ ବା ବିଚାରର ସମୟରେ ଗୁଣର ତଫାତ ଜଣାପଡ଼େ—ଏହି ଭାବରେ କଥାଟି ବ୍ୟବହୃତ| ବାହାରର ଚମକ ଅପେକ୍ଷା କାମରେ ଦିଶୁଥିବା ଗୁଣକୁ ପରଖିବାର କଥା ଏଥିରେ ଅଛି|

Literal meaning

Glass is glass, a gem is a gem; buying and selling reveal which is which.

Meaning

Resemblance and confident claims are not enough to establish value. The saying imagines a transaction as the moment when differences become consequential. It can be used when an attractive promise finally has to face a practical test.

An example · original

Two suppliers make equally impressive promises; a buyer asks to see their finished work before deciding. (New editorial example, not a collected quotation.)

In context

The image comes from comparing valuable objects with lookalikes. It is a metaphor about testing claims, not a guarantee that markets always recognise quality.

Similar appearances invite a closer look.

A nod need not mean understanding.

Words & appearances · Dhaga 025

ଏଣ୍ଡୁଅପରି ମୁଣ୍ଡ ଟୁଙ୍ଗାରିବା

Nodding without understanding

ଏଣ୍ଡୁଅର ମୁଣ୍ଡ ହଲାଇବାକୁ ମଣିଷର ହଁ ଭରିବା ସହ ମେଳାଯାଇଛି| କଥାଟି ବୁଝିଛି କି ନାହିଁ ନଜାଣି କେବଳ ସମ୍ମତି ଦେଇ ଚାଲିଲେ ଏହି ବ୍ୟଙ୍ଗ ଖାପ ଖାଏ| ମୁଣ୍ଡ ହଲାଇବା ଓ କଥାଟି ବୁଝିବା ଅଲଗା; ହଁ ଶୁଣିଲେ ମାତ୍ର ବୁଝାମଣା ହୋଇଗଲା ବୋଲି ଭାବିହେବ ନାହିଁ|

Literal meaning

Nod the head like a lizard.

Meaning

A person keeps signalling agreement whether or not they understand what is being said. The source’s gloss makes the gap between the nod and comprehension explicit. The expression can tease empty assent or call attention to it when a real decision requires understanding.

An example · original

After a complicated explanation, a listener nods along but cannot say what they have agreed to do. (New editorial example, not a collected quotation.)

In context

The animal comparison belongs to the figurative expression. The entry makes no zoological claim about why a lizard moves its head.

ଭିତରେ ଭିତରେ ସଲା ସୁତୁରାଲୋ
ଉପରେ ଉପରେ କଳି |

A quarrel staged for others

ବାହାରେ ଝଗଡ଼ାର ଦୃଶ୍ୟ, କିନ୍ତୁ ଭିତରେ ଦୁଇ ପକ୍ଷର ବୁଝାମଣା ରହିଛି| ଲୋକଙ୍କୁ ଭୁଲ୍ ବୁଝାଇବା ପାଇଁ ବିରୋଧର ଅଭିନୟ କରାଗଲେ ଏହି କଥା ଖାପ ଖାଏ| ସତରେ ମତଭେଦ ହେଉଥିବା ସାଙ୍ଗମାନଙ୍କୁ ମାତ୍ର ଦେଖି ଏପରି ଗୋପନ ବୁଝାମଣା ଧରିନେବା ଠିକ୍ ନୁହେଁ|

Literal meaning

Dirt between the fingers; agreement behind the scenes, quarrelling on the surface.

Meaning

Two sides appear to fight while privately cooperating. The repeated contrast between inside and outside exposes a performance meant to mislead an audience. The saying accuses the quarrel of being staged; it does not merely describe people who disagree but remain friendly.

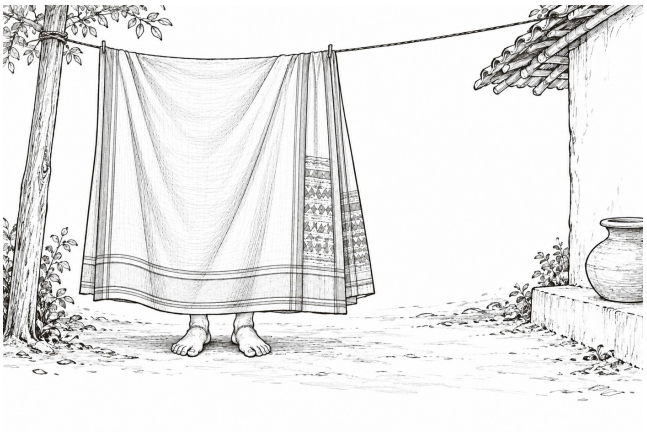
An example · original

Two organisers loudly blame each other in public, although they have already agreed privately to divide the benefit. (New editorial example, not a collected quotation.)

In context

The three source lines are retained. The address particle ଲୋ adds a conversational voice; the English rendering conveys the contrast without inventing a named listener.

Imagined organisers: agreement in private, quarrel in public.



The sari hides the person, but the feet give her away.

Words & appearances · Dhaga 037

ଲୁଚିଛି ନା ଗୋଡ ଦିଇଟା ଦିଶୁଛି!

A hiding place that gives you away

ଲୁଚିବାର ଚେଷ୍ଟା ଚାଲିଛି, ହେଲେ ପାଦ ଦିଶୁଥିବାରୁ ଲୁଚା କଥାର ଆଭାସ ମିଳୁଛି| ନିଜେ ଛାଡ଼ିଦେଇଥିବା ଚିହ୍ନରୁ ଗୋପନ କଥା ପଦାରେ ପଡ଼ିବାକୁ ଏହା ବୁଝାଏ| ଲୁଚାଇବାକୁ ଚାହୁଁଥିବା ଲୋକର ନିଜ ଅସାବଧାନତା ହିଁ ଏଠାରେ ହାସ୍ୟର କାରଣ|

Literal meaning

Are you hiding? Your two feet are showing!

Meaning

Someone's attempt to conceal a matter leaves an obvious clue. The question punctures the pretence of secrecy: what is meant to be hidden is still visible. It can tease a transparent excuse without proving any particular accusation.

An example · original

A friend tries to keep a surprise parcel hidden, but its wrapping sticks out of the bag. (New editorial example, not a collected quotation.)

In context

The licensed page gives this as an additional expression beneath another saying. It is recorded here in its own wording; the neighbouring saying and its gloss are not treated as identical.

Words & appearances · Dhaga 043

ଠାକୁର ଘରେ କିଏ ରେ? ନାଁ। ମୁଁ କଦଳୀ ଖାଇନାହିଁ

An answer that reveals too much

କେବଳ କିଏ ଅଛି ବୋଲି ପଚାରାଗଲା, କିନ୍ତୁ ଉତ୍ତରରେ କଦଳୀ ଖାଇବାର ଅସ୍ୱୀକାର ଆସିଲା| ଯେଉଁ କଥା ପଚରାଯାଇନଥିଲା, ତାହା ନିଜେ ଉଠାଇବାରୁ ମନର ଚିନ୍ତା ପଦାରେ ପଡ଼ିଲା| ଅନାବଶ୍ୟକ ସଫେଇର ମଜାକୁ ଏହା ଧରେ; ଏପରି ଉତ୍ତର ଏକାକୀ ଦୋଷର ପ୍ରମାଣ ନୁହେଁ|

Literal meaning

Who is in the shrine room? Well, I have not eaten the bananas.

Meaning

The question asks who is there, but the answer denies an act nobody mentioned. That unsolicited detail directs attention to the speaker's possible concern. The humour comes from the mismatch between question and reply; a defensive answer alone does not establish guilt.

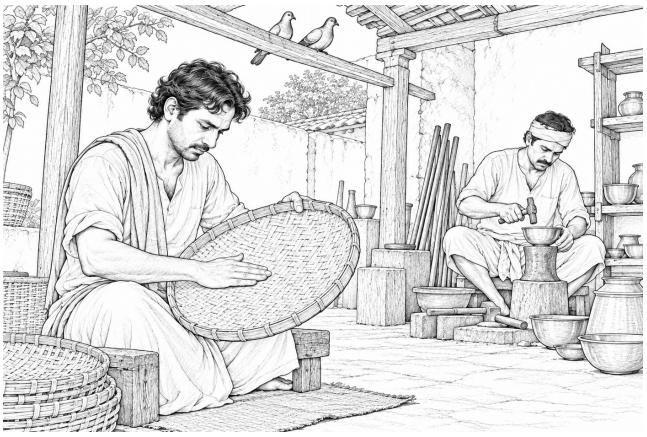
An example · original

Asked who used the desk, someone immediately replies that they did not break the pen. (New editorial example, not a collected quotation.)

In context

The dictionary quotes this dialogue under the connective use of na and explicitly calls it a dhaga. The shrine room and bananas belong to the saying; no actual theft, temple custom or origin story is asserted.

The explanation arrives before the accusation.



A little noise leaves the workshop pigeons unmoved.

Literal meaning

To the bell-metal worker's household pigeons: bang, bang with a winnowing tray!

Meaning

An attempt to startle or impress has little effect on someone already accustomed to the disturbance. The joke contrasts the small display of noise with the noisy workshop imagined around the birds. It can describe an empty threat made to an experienced listener.

An example · original

A seasoned performer remains calm when someone tries to unsettle them with a little backstage commotion. (New editorial example, not a collected quotation.)

In context

The workshop and winnowing tray form the saying's acoustic image. Kansari is translated through the craft role in this expression; it does not establish the identity of any present maker or an inherited community trait.

Literal meaning

To make a palmyra fruit out of a sesame seed.

Meaning

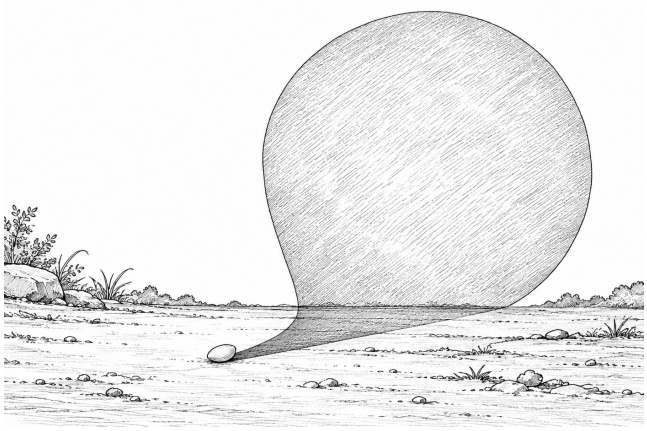
A tiny seed is imagined as something much larger. The expression calls out exaggeration: a small mistake, slight or difficulty has been enlarged beyond proportion. Its force is a brisk objection to the scale of the telling, rather than a claim that the original problem did not exist.

An example · original

A message arrives a few minutes late, but its recipient retells the delay as though the entire gathering nearly failed. A friend asks them not to make so much of it. (Original editorial example, not a collected quotation.)

In context

The compact sound-pair ତିଳ and ତାଳ carries the jump in scale. The English rendering takes ତାଳ as the palmyra fruit; the short witness does not spell out that referent, so this lexical choice remains for fluent-reader review. The explanation should not be used to dismiss another person's distress without understanding it.



A small thing grows large in the telling.

Much display, little to display.

Literal meaning

Such a fuss over nothing: no ring, yet so much stamping of the feet.

Meaning

An exaggerated display outruns what there is to display. The source gloss connects it with being agitated over nothing.

An example · original

A group celebrates a project so loudly that nobody notices it has not yet begun. (New editorial example, not a collected quotation.)

In context

The witness does not specify the ring's position or supply a story behind the image.

Literal meaning

If the thief's mother cries, she cries rubbing her eyes.

Meaning

The source reads the display of distress as concealed support for a wrongdoer. The charge is complicity behind appearances, not proof that a crying relative is guilty.

An example · original

Someone publicly deplores a friend's deception while privately helping conceal it. (New editorial example, not a collected quotation.)

In context

The maternal figure belongs to the saying; responsibility cannot be inferred from kinship or tears alone.

Literal meaning

A shameless show-off: no betel leaf, no areca nut, only an empty pouch!

Meaning

The accessory promises substance that is absent. The source gloss identifies shameless outward boasting.

An example · original

A lavish brochure advertises a service that nobody can actually provide. (New editorial example, not a collected quotation.)

In context

The betel pouch supplies the contrast. “Show-off” renders the source’s overall sense; the colloquial opening is not independently glossed word by word.

Meaning

The supposed witness has a connection to the person being defended. The pointed question is whether that testimony is independent.

An example · original

A seller cites only their business partner as proof of a product’s quality. (New editorial example, not a collected quotation.)

In context

The occupational caricature is not evidence about any community’s honesty. Shared interests invite scrutiny, not automatic disbelief.

Meaning

How something is done matters. Well-chosen words are compared with hair arranged by a practised hand.

An example · original

A colleague makes a difficult request gently and clearly, helping everyone respond. (New editorial example, not a collected quotation.)

In context

The dictionary places this under arranging hair and labels it ଢଗ. The comparison concerns skill, not a rule about personal appearance.

Literal meaning

One day’s rice; ages of reputation.

Meaning

A brief occasion can leave a lasting impression, good or bad. Its memory outlasts the meal.

An example · original

Guests remember a host’s considerate welcome long after the gathering ends. (New editorial example, not a collected quotation.)

In context

The dictionary places କଥା here under fame or notoriety and labels the saying ପ୍ରବଚନ. No particular feast is identified.

Literal meaning

Whatever the manner of the speech, it feels like mockery to me.

Meaning

A listener hears ridicule, whatever the speaker intended. The contrast draws attention to how words are received.

An example · original

A playful remark lands badly with someone already upset. (New editorial example, not a collected quotation.)

In context

The dictionary gives this under manner and a related wording under intention. No particular speaker or quarrel is identified.

Literal meaning

A hide-drum carries one kos; the mouth's drum a thousand kos.

Meaning

News passed from person to person can spread much farther than a sound heard at its source. The contrast is deliberate exaggeration, not a measured claim about distance.

An example · original

A small announcement at a village gathering is being discussed in distant households the next day. (New editorial example, not a collected quotation.)

In context

The dictionary's sense1 is a report or rumour carried by word of mouth. The longer witness is retained; the discovery list gives only its latter idea.

Literal meaning

A cat as a Vaishnava devotee.

Meaning

A show of devotion conceals conduct that contradicts it. The target is the mismatch between appearance and action, not believers as a group.

An example · original

A fictional official advertises personal virtue while secretly taking unfair benefits. (New editorial example, not a collected quotation.)

In context

Literal meaning

Silence is a sign of agreement.

Meaning

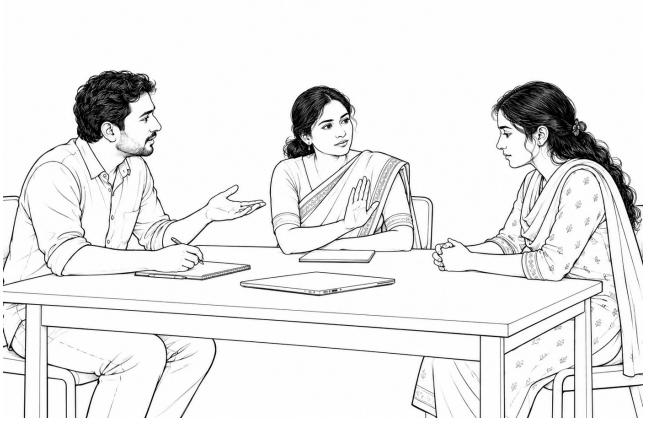
This maxim describes an inference people make from another person's silence. Silence can also mean hesitation, fear or uncertainty, so it does not establish that someone has agreed.

An example · original

A chair assumes the quiet room approves a plan; a participant asks for an explicit response from everyone. (New editorial example, not a collected quotation.)

In context

The dictionary identifies a Sanskrit maxim. It is documented here as an expression to examine, not permission to treat silence as consent.



Imagined meeting: silence still needs a clear answer.

Literal meaning

To give someone “good and middling”.

Meaning

The ordinary words suggest grades of quality, but together they can describe harsh treatment. In the dictionary’s example, the speaker sends someone away after giving them blows and abuse. The expression conveys that rough reception; reading the words as praise would miss the point. The source records the usage, not a recommendation to treat anyone this way.

An example · original

In a fictional account of a quarrel, a neighbour says that a visitor was given “uttama madhyama” before being sent away. The phrase signals a rough encounter, not a warm welcome. This is an original illustrative situation, not a collected account.

In context

This is an idiomatic expression documented within a dictionary example, rather than a complete proverbial sentence. The entry heading uses an editorial infinitive for easy lookup. The witness retains the sentence’s actual inflected wording and the dictionary’s explanation. No claim is made about when or where the expression began.

Literal meaning

The boastful person’s Barabati farming.

Meaning

In this source’s gloss, the expression mocks undertaking or talking about work without understanding it. The element Barabati is retained untranslated and is not independently resolved here.

An example · original

Someone promises a complex project without knowing its basic requirements. (Original editorial example, not a collected quotation.)

In context

No origin story is supplied. The wording alone does not establish a place or an actual farming episode.

Meaning

Food lacking salt becomes an image for talk that has little substance. It questions what the words contribute, not a person’s manner of speaking.

An example · original

A long answer adds nothing relevant to the question. (Original editorial example, not a collected quotation.)

In context

The recorded wording is explained here without assigning an inventor, date or place of origin.

Meaning

The source mocks confident description without firsthand knowledge. The stated number belongs to the boast being questioned, not a botanical lesson.

An example · original

Literal meaning

Mali arrived, clapped, and ran away carrying the plate of khichdi.

Meaning

A show of activity diverts attention while someone takes the thing that matters. The rhyme exposes the trick rather than admiring the theft.

An example · original

During a noisy discussion about small expenses, someone quietly takes the shared funds. (Original editorial example, not a collected quotation.)

In context

The source supplies a deception gloss. ମାଳି is retained as the rhyme's label; it is not evidence about a community's conduct.

Literal meaning

“Thaka thaka Mali, bhajana tana”; when hunger comes, bring the rice near. (The opening phrase is retained in transliteration because its precise literal force remains uncertain.)

Meaning

The verse sets a loud display of devotion beside an ordinary appetite. It can be read as a jab at performance that conceals self-interest, though the source gives no separate explanation.

An example · original

A fictional character makes a grand show of sacrifice but promptly insists on a special meal. (Original editorial example, not a collected quotation.)

In context

ମାଳି remains a source label, not a judgment about a caste or occupation. Neither hunger nor devotional singing is itself treated as proof of hypocrisy. The opening ଠକ ଠକ and ଭଜନ ଟାଣ are not given a definite literal gloss; the interpretation remains provisional.

In a crisis they promise a chicken; when the crisis passes they give “ନେଫେଡ଼ା” (the final noun is left untranslated because its meaning is unresolved here).

Meaning

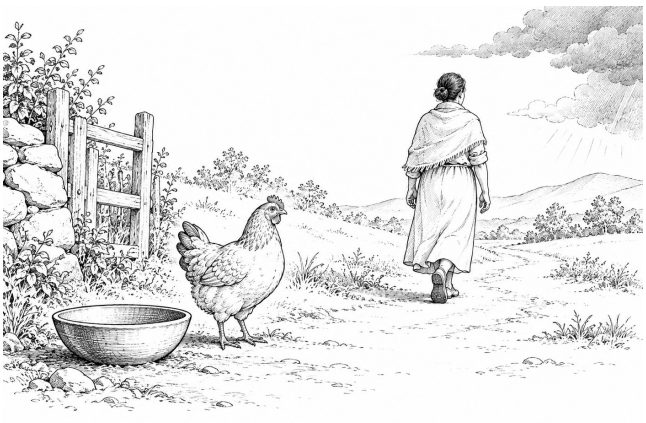
The source explains this as a vow made to God during danger and neglected once the danger passes. More broadly, it can remind someone not to forget a promise after receiving help. The precise meaning of the final noun is unresolved; the interpretation follows the supplied gloss.

An example · original

After asking for urgent help and promising to return it, someone stops answering once their own problem is solved. (Original editorial example, not a collected quotation.)

In context

The religious vow is the source’s explanatory setting, not a recommendation or a claim that everyone follows this practice. A previously deferred dictionary saying has different wording; no equivalence or repaired final word is certified.



A promise left behind after fear passes.

Literal meaning

Chaita! Will you eat hot food or pakhala? Say so while there is still time.

Meaning

The pointed address and choice between hot food and pakhala turn a practical request into a memorable line: say what you want while another person still has time to arrange it. The dictionary marks Chaita as a non-respectful form of Chaitanya, so the tone can carry impatience or a dismissive edge. Applying it to other decisions is an editorial reading of the complete quoted example; its first occasion is unknown.

An example · original

A friend arranging a shared journey asks everyone to confirm their plans before tickets are booked. (New editorial example, not a collected quotation.)

In context

The source identifies Chaita as a non-respectful or dismissive form of Chaitanya. No particular historical person or household is established. Pakhala remains a named food; the wording should not be softened into a uniformly polite request.

Literal meaning

The person dancing feels no embarrassment; the person watching does.

Meaning

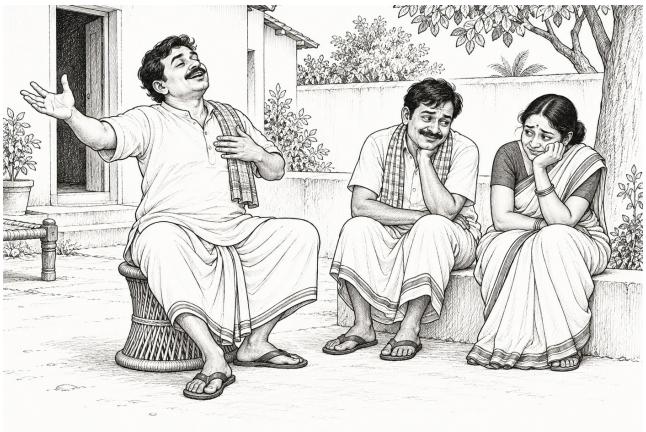
The dictionary explains a mismatch: someone behaves without embarrassment while witnesses feel ashamed on that person's behalf. The saying can name that uncomfortable distance between an action and how it appears to others. Its image need not be used to condemn dancing or to police someone's harmless enjoyment.

An example · original

Someone loudly claims credit for a group effort while their companions exchange embarrassed looks. (New editorial example, not a collected quotation.)

In context

The dictionary explicitly labels the entry a proverb and gives this social-use gloss. Its alternative scatological wording is not needed for this candidate.



The onlookers feel the embarrassment.

Literal meaning

The cat may be doing nahunia exercises beside the stove; the boy displays empty boasting.

Meaning

The source introduces this line for unnecessary swagger. A cat's ordinary-looking movement by the stove is set beside a boy making much of himself. The disproportion makes the boast look small: loud self-display is not itself an achievement.

An example · original

Someone claims to be an expert after one easy practice task, and a friend gently punctures the swagger. (Original imagined occasion.)

In context

The dictionary lists nahunia as a kind of bodily exercise, which supports retaining an exercise image; no precise pose or movement sequence is established. The source's own usage condition supports the swagger reading. The literal rendering of ନୁଖୁରା as empty remains contextual rather than separately dictionary-certified.

Literal meaning

If someone drinks water while submerged, even Mahadev's father will not know.

Meaning

The dictionary places this example under doing something secretly. Drinking is hidden within the larger act of being underwater, so an observer cannot easily separate one from the other. The extravagant appeal to Mahadev's father makes the claim of secrecy comic. It can describe someone's confidence that a concealed action will escape notice; it does not establish that deception always succeeds.

An example · original

While supposedly tidying a shared desk, someone quietly removes a note and assumes nobody noticed. (Original imagined example, not collected testimony.)

In context

The expression is comic hyperbole, not theological genealogy or an instruction to drink underwater. Source spelling ପରିବେ is retained, not silently changed to ପାରିବେ.

Literal meaning

To wipe out at the root.

Meaning

This is an expression for complete destruction, not merely a setback or a surface change. The source pairs it with another expression and explicitly glosses both as destroying something entirely. The root image makes the degree of loss clear: what might have allowed it to continue has also been removed.

An example · original

A flood has destroyed a family’s stored seed, tools and the shed itself; a neighbour uses the expression to describe the extent of the loss. (Original imagined occasion, not a collected quotation.)

In context

Selected as the second expression in the source’s slash-separated pair ଖୋଳ କରିବା/ମୂଳପୋଛ କରିବା. The source’s first term is retained as a related expression, not silently translated through a guessed literal sense or counted as a second entry.

Literal meaning

The words will remain for all time.

Meaning

A conversation ends, but what was said can remain in memory. The dictionary labels this short line a Dhaga under “for ever”. It can give a promise weight or warn that a remark will not be easily forgotten. Which feeling it carries depends on the speaker and the occasion; the source does not specify a single original scene.

An example · original

Two friends recall a promise made years earlier; one says that the words have stayed with them. (Original imagined example, not collected testimony.)

In context

Possible uses are editorial readings, not recorded testimony. Source spelling ରହିଯିବ is retained; no guarantee that every utterance survives.

A quiet conversation recalls a promise that has stayed.

Literal meaning

By keeping their nails and hair, how many bears have become yogis?

Meaning

The question makes an outward resemblance look absurd. A bear has hair and claws, but those features do not make it a yogi. The joke challenges the idea that an appearance can stand in for the practice it is supposed to signify. Applied elsewhere, it can puncture showy signs of expertise without the patient work behind them; that wider application is an editorial reading of the image.

An example · original

Someone buys an impressive set of painting tools but never practises; a friend jokes that owning the outward signs does not yet make an artist. (Original imagined example, not collected testimony.)

In context

The source places the question under letting nails and hair grow and explicitly labels it Dhaga. The broader expertise example is an original analogy, not a documented customary use. Do not treat hair, dress or religious affiliation as evidence of dishonesty, or attribute the saying to a particular yogic tradition.

Literal meaning

When Brahma speaks incoherently, it is the Veda.

Meaning

The saying makes the speaker's standing outweigh the clarity of the words. Even incoherent speech is received as scripture when it comes from Brahma. The dictionary places this example under the sense "to speak incoherently" and labels it a Dhaga. The further reading offered here is satirical: a statement can acquire authority merely because of who says it. That is an editorial interpretation of the contrast, not a doctrinal account of the Vedas.

An example · original

A vague remark by a famous speaker is repeated as a firm rule, although nobody can explain what was meant. (Original imagined example, not collected testimony.)

In context

Brahma and the Veda remain the source's cultural anchors. The dictionary supports the lexical sense and identifies the example as Dhaga; the prestige-over-clarity interpretation is Project Odisha's reading. No originating scripture passage or religious teaching is asserted, and the saying is not attributed to Brahma as its author.

Literal meaning

The analogy of an ant-line forming.

Meaning

This is a visual comparison rather than a rebuke. The dictionary describes a place where many people gather and compares their movement to a line of ants. The eye follows the continuing file of people. The source does not turn the image into a lesson about obedience, hard work or unquestioning conformity.

An example · original

Looking down from a terrace as people file towards a fair, someone remarks, “ପିମ୍ପୁଡ଼ି ଧାର ଲାଗିବା ନ୍ୟାୟ|” (Original imagined use.)

In context

The headword is preserved in the saved digital witness. The gloss contains the different spelling ପୁମ୍ପୁଡ଼ି; that discrepancy remains in the exact capture rather than being silently repaired. Genre is descriptive analogy.

Literal meaning

Have a lifespan like the jahni flower: bloom at dusk and be gone by morning.

Meaning

The line opens like a blessing for someone's life, then gives that life only the span from dusk to morning. The dictionary explicitly marks it as an ironic blessing and says it is spoken in jest. That reversal, rather than a gentle wish for longevity, is the point of the joke. The flower supplies the source's image of brevity; this explanation is not a botanical lifespan claim. Depending on the relationship and occasion, such a mock blessing can sound playful or cruel.

An example · original

Original imagined example: A friend announces yet another promise to start a daily walk tomorrow. Remembering yesterday's abandoned plan, another friend quotes the flower blessing about the new promise, and both laugh at how briefly the last resolve lasted. Applying the image to a promise rather than a person's life is an editorial transfer in this example.

In context

This is a documented mock blessing, not an instruction to wish someone harm. The printed entry's dusk/morning wording supports the irony; no particular ceremony, speaker, first author or origin event is established. Surrounding dictionary material on a flower-related observance is a separate entry and is not imported as this saying's origin.

Literal meaning

One eats from the pot, but goes to bathe when its contents fall on the foot.

Meaning

The same food is welcome in the mouth and suddenly objectionable on the foot. That abrupt change is the comic hinge of the line: acceptance in one situation turns into an elaborate response in another. The dictionary supplies the bathing sense but no separate moral gloss. Our reading treats the contrast as a possible tease about selective fastidiousness or inconsistent standards. It does not establish that bathing is always excessive, or that a particular ritual or community is being described.

An example · original

Original imagined example: A friend happily eats a sticky sweet with their fingers, then protests loudly when a little syrup touches their shoe. Another friend quotes the saying with a smile while offering a cloth. This harmless transfer is editorial, not a documented historical use.

In context

No named caste, purity rule or bathing custom is inferred. The interpretation of inconsistent standards is editorial close reading; the source attests the words and literal verb.

An imagined contrast: enjoying the sweet, protesting the small spill.

Literal meaning

A worthless cowrie, a bitter palm fruit—give these at night.

Meaning

Two disappointing things are paired with a convenient hour for giving: darkness. The dictionary identifies the cowrie as tiny or broken and, in the latter sense, worthless shell money. The saying itself gives no explanatory story. One possible reading is a dry joke about passing on something poor when its defects may be harder to notice. The surface instruction need not become our advice: quoted critically, it can expose the attempt to make a bad offering pass for a good one. We do not infer who receives them, or a custom that required such giving.

An example · original

Original imagined example: A friend notices that a damaged second-hand lamp is being shown to a buyer only in a dim corner. They quote the saying and ask that the lamp be brought into the light before anyone decides. This modern scene is an editorial use, not a documented trading custom.

In context

The cowrie is a historical money image in the source gloss. The darkness/deception interpretation is not separately defined there and remains an editorial reading. No specific recipient, ritual, trade practice or origin is supplied. The fruit wording is retained without a botanical or dietary claim.

Literal meaning

Have a temple built and your name spreads; defecate on the road and your name spreads.

Meaning

The same phrase, “your name spreads”, carries two very different kinds of attention. Building a temple supplies the respectable image; fouling the road abruptly drags it down into coarse comedy. The dictionary places the saying under notoriety, after a separate sense for good reputation. Being talked about is therefore not enough to tell whether someone is admired or condemned. In an editorial everyday use, the line can puncture a boast about publicity by asking what earned it. Its shock is part of the contrast, not an instruction to humiliate a person or a claim about a particular temple builder.

An example · original

Original imagined example: After a noisy argument at a neighbourhood meeting, a participant boasts that everyone is talking about him. A friend quotes the saying and asks whether he wanted to be remembered for the quarrel or for helping solve the problem. No actual meeting or person is being described.

In context

The coarse bodily verb is retained in the exact quotation and literal translation. The example uses a non-bodily modern situation. The Radhanath quotation in the preceding dictionary sense is a separate named literary example and is not presented as the author of this saying.

Literal meaning

Different sages have different opinions.

Meaning

The repetition makes disagreement unsurprising: several thinkers need not arrive at one view. The line can loosen a conversation that has stalled because each side expects complete agreement. It does not tell us that all opinions are equally well supported, or that a decision can be avoided forever. Rather, in our reading, it creates a little room to hear why people differ before choosing what to do. The dictionary supplies “different opinions” and this example; it identifies no particular sages or dispute.

An example · original

Original imagined example: Three experienced readers propose different endings for a play. The director smiles, quotes the saying, and asks each to explain what their ending would achieve before the group chooses.

In context

No named sages, scriptural derivation or origin established. Acceptance of disagreement is an editorial application, not a claim that all claims are equally true.

Literal meaning

A village’s reputation is known from the washer’s bathing or washing place.

Meaning

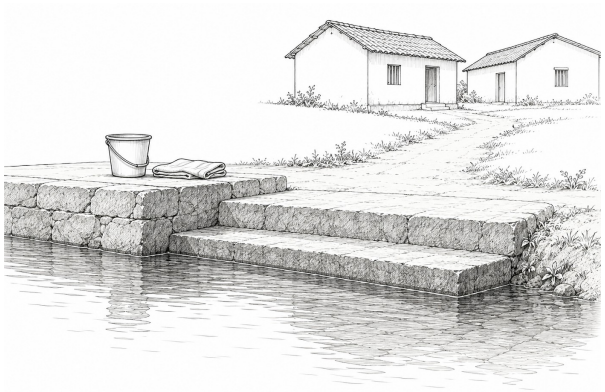
The dictionary glosses the village’s “fragrance” as its greatness or reputation. The saying locates a clue to that reputation in an ordinary washing place rather than in a grand announcement. Our reading takes this as a contrast between what is claimed and what everyday surroundings reveal. It can encourage looking at a shared, practical corner before accepting a polished description. It does not supply a sanitary test or establish that the whole character of a community can be judged from one place.

An example · original

Original imagined example: A club advertises its excellent organisation, but leaves its shared workroom unusable. A member quotes the saying to suggest that the everyday space deserves attention before another publicity campaign.

In context

Historical occupational image is retained without making caste traits or purity claims. The headword supplies reputation; everyday-maintenance application is editorial. No measured sanitation, geography or community assessment is claimed.



An imagined everyday place through which a settlement is seen.

An imagined joke after the last biscuit.

The mouth ate, not I

ଖାଇଛି ପାଟି, ମୁଁ ନୁହେଁ—ନିଜ ଅଙ୍ଗକୁ ଅଲଗା କରି ଦାୟ ଏଡ଼ାଇବାର ଅଦ୍ଭୁତ ଯୁକ୍ତି। ତାହା ପରେ ନିୟାମ କରିବାକୁ ଡାକିବାରେ ସେହି ଦୁର୍ବଳ ସଫେଇ ଆହୁରି ହାସ୍ୟକର ହୁଏ। ଆମ ପଢ଼ାରେ, କଥାର କର୍ତ୍ତା ବଦଳାଇଦେଲେ ମଧ୍ୟ କାମଟି ବଦଳେନାହିଁ—ଏହା ସେହି ଫାଙ୍କିକୁ ଧରେ। ଯେଉଁଠି ସଫେଇଟି ନିଜେ ନିଜର ଅସଙ୍ଗତି ଦେଖାଇଦେଉଛି, ସେଠି ଏହି ରସ ଲାଗେ; ସବୁ ଅସ୍ୱୀକାରକୁ ମିଛ ଭାବିବାର କଥା ନୁହେଁ।

Literal meaning

I have not eaten; my mouth has eaten. Come, let us take an oath.

Meaning

The speaker tries to separate the mouth from the person who used it. The invitation to swear then gives this flimsy distinction an exaggerated air of certainty. Read as a joke about evasion, the line exposes how changing the subject of a sentence can leave the action unchanged. The dictionary explains taking an oath and records the saying; the account of evasive reasoning is our close reading. Its comic force lies in the transparent excuse, not in proving that every denial is dishonest.

An example · original

Original imagined example: A friend finishes the last biscuit and jokingly claims that only their mouth ate it. Another answers with the full saying, including the invitation to swear. Both know what happened, so the exchange makes fun of the excuse rather than staging an accusation.

In context

The source labels niyāma karibā a rural verb for swearing an oath. That register label is not evidence of rural dishonesty. No specific oath ritual, legal validity or origin story is supplied.

Literal meaning

Shatikai went to Purastama and died talking and talking.

Meaning

The repeated talking carries the taunt to an exaggerated ending. The dictionary explicitly marks Shatikai as a satirical feminine term for a lying or talkative woman; this is an insult, not a neutral portrait. Our reading follows how the verse makes speech swallow the whole journey. Its verbal energy can be appreciated while questioning its gendered target and refusing to treat women’s speech as an inherent fault.

An example · original

Original imagined example: During a discussion of old sayings, someone quotes this line about a woman who speaks at length. Another listener enjoys the repeated sound but asks why the criticism singles out women. They discuss whether interruption, rather than gender, is the actual problem. No historic conversation is claimed.

In context

227729 defines Purastama as Puri and as a personal name. Literal translation retains the word; no pilgrimage, identified woman, actual death or named poet is inferred.

An imagined discussion of an old saying and the person it targets.

Literal meaning

Come, ox, gore me.

Meaning

The speaker imagines someone summoning the very trouble they could have avoided. Used ironically, it criticises an unnecessary provocation or a knowingly risky decision. It should not be used to blame someone for harm they did not choose.

An example · original

A person interrupts an argument that has nothing to do with them merely to insult both sides; a friend may use this saying. (New editorial example, not a collected quotation.)

In context

ବଳଦ is rendered here as ox or bullock. The horned animal supplies the force of the image; the wording alone cannot establish a particular village, farming community or date of origin.

Literal meaning

Swinging a stick in darkness.

Meaning

A stick swung in darkness may miss its intended target because the person cannot see where to aim. The expression describes guesses or effort without adequate information. Its criticism is not that no effort is being made, but that effort has no dependable direction.

An example · original

Several people keep changing settings on a faulty device without checking what has failed. One suggests identifying the problem first instead of trying changes at random. (New editorial example, not a collected quotation.)

In context

This is an idiomatic action phrase rather than a complete rhyming couplet. Darkness is the image for missing information; no specific origin incident has been established.

Effort needs a direction.

Literal meaning

Hey, you—whatever the occasion calls for.

Meaning

This compressed expression advises a fitting response to the circumstances. It may interrupt someone who insists on handling every situation in the same way. The point is practical judgement about this occasion, rather than a rule that commitments can always be discarded.

An example · original

A host changes the outdoor arrangements when rain begins instead of insisting on the original plan. (New editorial example, not a collected quotation.)

In context

The source itself supplies an English gloss about appropriate action. The elliptical Odia is retained; the English rendering makes the implied advice explicit.

Literal meaning

Planned beforehand, yet all still raw!

Meaning

An advance plan may look settled until circumstances put it to the test. The source explains the line as a warning that earlier arrangements can fall apart at the appointed time. It tempers certainty without making preparation itself pointless.

An example · original

Friends confidently divide festival duties, then discover on the day that several people cannot come. (New editorial example, not a collected quotation.)

In context

Literal meaning

A one-eyed maternal uncle is better than no maternal uncle.

Meaning

The comparison expresses a preference for an imperfect resource over having none. Its family image assumes that an uncle can offer care or assistance. The point can be explained without treating disability as a measure of a person's worth.

An example · original

A reading group uses a small borrowed room while waiting for a larger meeting space. (New editorial example, not a collected quotation.)

In context

The historical-style dictionary explanation connects the maternal uncle with care for a nephew. The disability language is preserved as documented wording and identified as a dated comparison; no universal family practice is asserted.

Literal meaning

Meaning

An early fault prompts a warning about what unchecked growth could bring. It criticises present behaviour, not a child's unchangeable nature.

An example · original

A tiny committee already imposes needless rules; someone wonders what it will do with greater power. (New editorial example, not a collected quotation.)

In context

The water-and-growth image is figurative. The source presents this as a negative warning.

In context

Siju is retained as the plant name. This is a figurative reading, not a zoological claim or a judgment of fixed intelligence.

Literal meaning

A distant mountain is beautiful; a distant friend is beautiful.

Meaning

Distance can hide the rough edges of a place or a relationship. What looks inviting from afar may feel different when we know its everyday difficulties. The saying gently questions an ideal picture; it does not claim that friendship needs distance.

An example · original

Someone envies a friend's life from holiday photographs; a longer visit reveals ordinary chores and worries too. (New editorial example, not a collected quotation.)

In context

The dictionary gives two parallel images: a mountain seen from afar and a friend kept at a distance. This explanation is an editorial reading of that contrast, not an origin story.

A distant hill and welcoming friends seen across a rough path.

Literal meaning

As when the hanging sling breaks to the cat’s good fortune.

Meaning

Something previously out of reach becomes available by chance. The cat benefits from a broken hanging food sling, rather than from a plan of its own.

An example · original

A cancellation unexpectedly frees a place on a fully booked course. (Original editorial example, not a collected quotation.)

In context

ଶିକା denotes a rope support for suspended vessels; its separate dictionary entry explains this comparison.

Literal meaning

The house is flooded knee-deep, yet the fellow cannot give up smoking his cheroot.

Meaning

The image mocks someone who clings to a habit while an urgent problem grows around him. The dictionary marks ପୁଅ here as a satirical reference to a person, not necessarily a child.

An example · original

A team faces an urgent deadline while someone keeps refreshing an entertainment feed. (Original editorial example, not a collected quotation.)

In context

The separate ପିକା entry identifies a cheroot. No smoking practice is recommended.

Literal meaning

A hare’s horn.

Meaning

The expression names something impossible or unreal. Its force comes from looking for a feature the animal does not possess.

An example · original

Someone asks for a plan with unlimited benefits and no cost or trade-off. (Original editorial example, not a collected quotation.)

In context

The dictionary explicitly explains figurative use and lists related impossible images. It is semantically related to existing ଆକାଶକୁସୁମ, but has a distinct image and wording.

Meaning

Determination can encourage someone to search for a workable approach. The saying offers encouragement, not a guarantee that desire removes every obstacle.

Meaning

Literal meaning

Swear by your father and swallow the dheṅki.

Meaning

The image turns coercion into an absurd demand: an oath cannot make an impossible task reasonable. The source gloss concerns forcing someone to act.

An example · original

A supervisor demands that a week's work be completed immediately. (Original editorial example, not a collected quotation.)

In context

Dheṅki is a large husking implement; swallowing it is hyperbole, not an action to imitate.

Literal meaning

Tamarind from the sky, fish from Chilika.

Meaning

The source uses ingredients brought together in an impossible way to mock an unrealistic proposition. Chilika supplies an image in the saying, not proof of where it originated.

Literal meaning

The goldsmith recognises gold.

Meaning

Experience can help a person recognise quality that others miss. This is a craft metaphor, not an inherited ability or a claim about every member of a community.

Literal meaning

The untamed buffalo stands watching; do not go near it, Danai.

Meaning

The warning makes caution concrete: noticing a danger should change how close one goes to it. This is a bounded editorial reading of the warning, not a documented account of an encounter.

An example · original

A worker notices an unstable stack and keeps others away until it is secured. (Original editorial example, not a collected quotation.)

In context

Literal meaning

A cucumber twelve cubits long contains a seed thirteen cubits long.

Meaning

The part has become larger than the whole that supposedly contains it. The dictionary explicitly calls this an impossible claim. The absurd measurements make a quick test for an exaggerated story: do its own details fit together? The point is inconsistency, not an accurate description of cucumber growth.

An example · original

A report claims that one hour-long meeting contained two hours of speeches without any overlap. (New editorial example, not a collected quotation.)

In context

Traditional hand-based length language is translated as cubits without a modern centimetre conversion. The source also records a sheath/sword variant, not a separate entry.

Literal meaning

According to the stake, the horse leaps.

Meaning

The source applies this image to disorder under weak supervision. The horse's movement is viewed in relation to what holds it, so the remark turns attention from the actor alone to the arrangement around them. In a wider everyday application, repeated disorder may reveal that responsibilities or boundaries have not been made clear. That wider application is editorial; the source does not supply a history of the image.

An example · original

At a shared event, supplies repeatedly go missing because nobody has been assigned to track them. Someone points to the loose arrangement rather than blaming one volunteer. (Original imagined occasion, not a collected quotation.)

In context

The weak-supervision reading comes from this source's gloss. Other readings of strength or support are not established here. The comparison is not a recommendation for harsh discipline or a claim that people are animals.

Literal meaning

The friend will remain; the jewel will remain.

Meaning

The words sound reassuring: neither precious thing need be lost. But the dictionary labels the saying ironic and applies it to someone who tries to preserve both sides and succeeds with neither. The sting lies in that gap between a comfortable promise and what actually happens. It can tease an attempt to avoid a difficult choice, rather than praise a successful compromise.

An example · original

A person promises to attend two gatherings at the same time, keeps postponing a decision and misses both; a friend uses the saying. (Original imagined example, not collected testimony.)

In context

The ironic, unsuccessful outcome follows the explicit dictionary gloss, not an inferred win-win moral. Friend/jewel are a literal reading, not identified historical characters or objects. Source-listed parallels are not claimed as independently verified variants.

ଗୁଡ଼ଘରେ ପିମ୍ପୁଡ଼ି ଜଗୁଆଳି

An ant guarding the jaggery

ଯାହାକୁ ଜଗିବାକୁ ଦିଆଗଲା, ଜଗୁଆଳିର ଲୋଭ ସେହି ଜିନିଷ ଉପରେ—ଚିତ୍ରଟିର ମଜା ଏଇଠି। ଅଭିଧାନ ଖାଦ୍ୟକୁ ତାହାର ଖାଦକ ଜିମାରେ ଦେବାର ଅସଙ୍ଗତି ବୁଝାଇଛି। କୌଣସି ଦାୟିତ୍ୱ ଦେବା ବେଳେ ଦାୟିତ୍ୱ ଓ ନିଜର ଲୋଭ ମୁହାଁମୁହିଁ ହେଉଥିଲେ, ଏହି ଛୋଟ ଚିତ୍ର ବଡ଼ ବ୍ୟାଖ୍ୟା ବିନା କଥାଟି ଧରାଇଦିଏ। ପ୍ରଶ୍ନଟି ସେହି ବ୍ୟବସ୍ଥାକୁ ନେଇ, କୌଣସି ଗୋଷ୍ଠୀକୁ ଜନ୍ମରୁ ଅସାଧୁ କହିବାକୁ ନୁହେଁ।

Literal meaning

An ant as the guard of the jaggery store.

Meaning

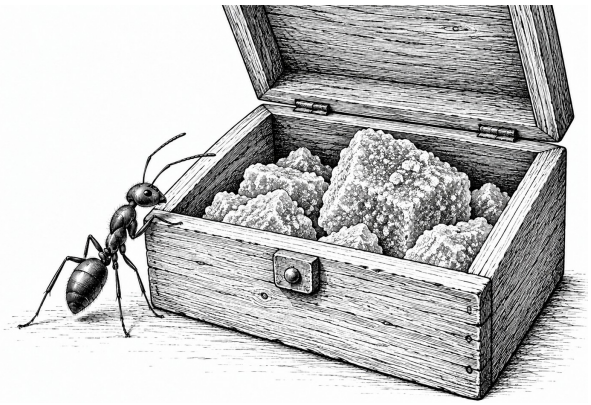
The supposed guard has an appetite for exactly what it must protect. The dictionary uses this mismatch for entrusting something to its would-be consumer: the arrangement itself puts the goods at risk. In conversation, the image can make a questionable appointment look absurd before anyone has to explain it at length. It questions a particular conflict between duty and temptation, rather than declaring that a whole kind of person is dishonest.

An example · original

A club puts its snack box in the charge of the member who keeps finishing the biscuits before meetings. Another member laughs, “ଗୁଡ଼ଘରେ ପିମ୍ପୁଡ଼ି ଜଗୁଆଳି!” They agree to keep the box available only when everyone arrives. (Original imagined example, not collected testimony.)

In context

The source explicitly explains entrusting food to its consumer. Modern organizational use is editorial extension, not documented origin. Parenthetical ପରିଛା is an alternative guard term in the source, not a new saying.



An imagined guard with an appetite for the store.

Literal meaning

The ant acquiring wings.

Meaning

The image sounds like a new freedom, but the dictionary turns it into a sign of approaching ruin or death. That reversal gives the expression its ominous force: what looks like an advance is read as a warning. A speaker may use it when another person becomes recklessly confident, though that particular application is an editorial example rather than a separate source gloss. The image carries an old belief; it is not a biological account of winged ants or a prediction that someone must come to harm.

An example · original

After one successful event, an organizer announces a much larger one without checking the costs. A friend remarks, “ପିମ୍ପୁଡ଼ିର ପକ୍ଷୀ ଲାଗିବା!” The organizer asks for the actual budget concerns rather than taking the remark as a prediction. (Original imagined example, not collected testimony.)

In context

Explicit source gloss is approaching ruin/death. Preserve its severe warning register; do not soften it into a simple celebration of growth or teach the surrounding obsolete zoology as fact. Digital ପକ୍ଷୀ retained exactly; printed note2 visually checked without silent modern replacement by ଡେଣା.

Literal meaning

Can a pot be filled by collecting dew?

Meaning

The question sets tiny drops against a vessel that needs filling. The dictionary describes collecting dew and compares a Hindi proverb about licking dew not satisfying thirst. The force is a challenge to adequacy: is what is being gathered enough for the need at hand? In an editorial everyday use, it can question token help offered in place of a sufficient response. That does not make every small contribution useless; the mismatch between the amount and the particular need is what gives the question its point.

An example · original

Original imagined example: A reading group needs enough notebooks for twenty children, but someone proposes bringing only two and calling the task finished. A volunteer quotes the dew-and-pot question, thanks them for the start, and asks how the remaining notebooks will be found. This is an invented use, not a source incident.

In context

The dictionary itself offers a Hindi comparison; this is not evidence of borrowing direction or a shared origin. The image is not a technical claim that dew can never be harvested. The adequacy and token-help applications are editorial readings supported by the question and comparison.

Literal meaning

Like losing something in a small tank and searching for it in a pond.

Meaning

The search has moved away from the place of the loss. A larger or more noticeable place will not become the right one simply because it attracts attention. As an analogy, the image can question effort directed at the wrong location or cause. It asks the listener to connect the search with what actually happened before continuing. The source defines the small tank and labels the comparison; this explanation extends the spatial mismatch into an everyday use, without claiming a particular lost object or origin story.

An example · original

Original imagined example: A team keeps checking the delivery van for a missing parcel, although its own register says the parcel never left the store. One member quotes the analogy and asks them to begin with the store records.

In context

The historical headword includes caste-ranked speech labels. Those labels are not adopted as facts about present communities. No animal, waterbody practice or actual loss event is reconstructed.

Literal meaning

One has climbed the tree to die; one has stood surety to pay.

Meaning

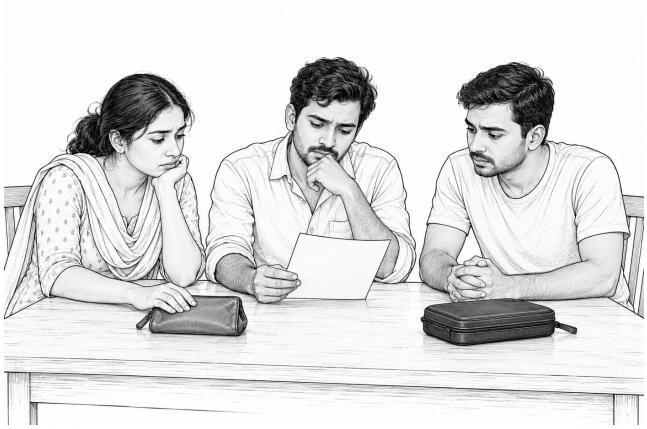
The line states possible consequences with deliberately bleak certainty. Climbing brings the danger of a fall; standing surety can leave the guarantor having to pay. The dictionary defines the latter as undertaking responsibility for another person's action. Our reading hears a warning against treating such an undertaking as empty words. It does not say that every climb is fatal or establish the legal effect of any present-day guarantee. The two compressed clauses make responsibility difficult to wave away.

An example · original

Original imagined example: A friend agrees to cover a group's equipment bill if the others cannot pay, calling it a mere formality. Another quotes the saying and asks whether the friend has considered actually meeting that bill.

In context

The stark death clause is rhetorical, not a prediction or safety instruction. Surety definition is historical lexical evidence; application is not current legal or financial advice. No actual contract is assessed.



An imagined promise becoming a responsibility.

An imagined contrast: the bird is visible, the danger less obvious.

Literal meaning

Has seen the dove, but has not seen the trap.

Meaning

The two halves separate familiarity with an attractive or ordinary sight from knowledge of the danger connected with it. Seeing the bird does not mean seeing the trap. In our reading, the line can warn against mistaking partial experience for a full understanding of a situation. It may also sound like a taunt to someone who thinks they already know enough. The dictionary identifies the bird but gives no trapping story; the modern application and tone are editorial possibilities, not proof of an original event.

An example · original

Original imagined example: A new organiser knows how to book a hall and assumes the whole event will be easy. An experienced colleague quotes the line, then explains the overlooked cancellation conditions. The analogy concerns incomplete preparation, not an actual bird trap.

In context

The dictionary labels the headword Medinipur; this does not establish birthplace or exclusive use. Bird identified generically as dove from source, no taxonomic or trapping instruction. Figurative application is our close reading; no supplied traditional moral gloss.

Literal meaning

Worn-out boat, you betrayed me in the middle of the river.

Meaning

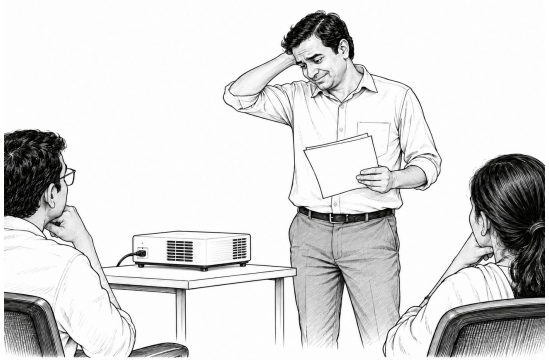
The boat is addressed as though it had broken a promise. Its failure comes in midstream, where the traveller is already relying on it and cannot simply step back onto the bank. That timing gives the short complaint its force. As an editorial application, it can describe an unreliable tool or arrangement failing at the moment it is most needed. The line supplies a vivid reproach; it does not establish a real accident or give instructions for crossing a river.

An example · original

Original imagined example: Halfway through a presentation, an unreliable projector stops working. The presenter smiles ruefully and quotes the boat line while opening a printed copy. The comparison is to badly timed equipment failure, not to an actual river incident.

In context

The source defines the river's middle and supplies the labelled quotation; it does not narrate an accident or identify a speaker. The figurative equipment example is original editorial application. The page carries a need-check category; no silent textual correction is proposed.



An imagined presentation interrupted by a projector failure.

An imagined moment of questioning a judgment about a whole group.

Literal meaning

All who are born from Lanka’s fortress are sons of asuras.

Meaning

The force falls on “all”: a shared place becomes a single verdict about everyone born there. The dictionary supplies the totalizing word and quotation; its Lanka entry separately identifies the mythological capital. Our critical reading notices how quickly this image shuts out individual differences. It can help us examine a sweeping accusation, but birthplace or descent does not establish anyone’s character.

An example · original

Original imagined example: After one team member breaks a promise, a friend declares that the whole team is alike. Another quotes the Lanka line and asks whether they have just made the same sweeping judgment. The expression is being examined critically, not endorsed as a rule about the team.

In context

212713 sense2 is lexical context only. Mythological imagery is not evidence about a present-day population; no event, epic authorship or origin of this saying is established.

Literal meaning

Cold does not finish with a single Magha.

Meaning

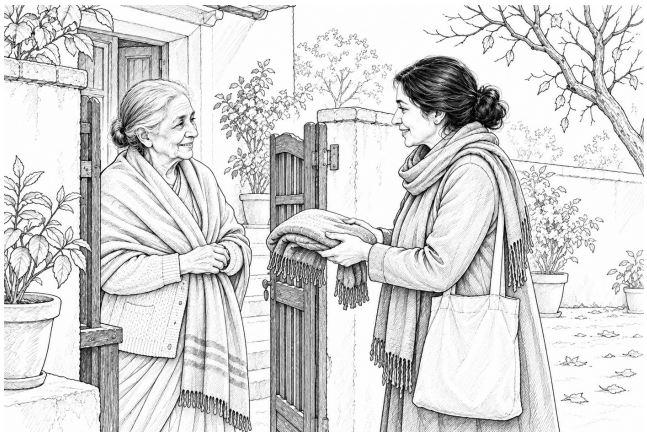
One difficult season is not the last occasion on which we may need help. The saying can warn against treating a temporary advantage as permanent, or remind someone who refuses help that circumstances may change. Tone matters: it can sound like practical advice or a pointed warning.

An example · original

After borrowing a tool successfully once, someone dismisses the neighbour who lent it. Another person reminds them that they may need that neighbour again. (New editorial example, not a collected quotation.)

In context

Magha supplies the seasonal image. The central point is recurring need and changing fortunes, not a precise forecast or a claim that cold is confined to one calendar month.



Another season may bring another need for help.

Literal meaning

Planting eggplant at wedding time.

Meaning

The joke is a mismatch between a long preparation and an immediate need. Planting a crop when the occasion has arrived cannot supply that occasion's meal. The saying criticises starting essential work too late, rather than the act of planting itself.

An example · original

The event starts tomorrow, but the organisers only now begin looking for a venue. Someone compares their timing to planting eggplant at wedding time. (New editorial example, not a collected quotation.)

In context

The wedding and vegetable crop create the contrast. This does not prove eggplant is required at every Odia wedding or identify a particular community's menu. The graphic illustrates lead time, not an agricultural timetable.

Literal meaning

Today you laugh merrily; tomorrow, what will you plough with?

Meaning

The teasing question asks what will remain after today's enjoyment. It warns against consuming the very means needed for tomorrow's work. The pleasure is immediate, while the cost becomes visible only when work must resume.

An example · original

Someone proposes selling essential work equipment to fund a lavish celebration; a relative answers with this question. (New editorial example, not a collected quotation.)

Literal meaning

Meaning

The image mocks preparation that runs ahead of any confirmed need. Someone has acted as though the next step were certain before checking whether the situation calls for it. The saying is sharper than a general reminder to plan carefully.

An example · original

Before a trip is agreed, a participant announces the departure date and begins making arrangements for everyone. (New editorial example, not a collected quotation.)

In context

The river and undressing belong to the saying's literal scene. They do not establish a particular place, journey or bathing custom as its origin.

Meaning

An example · original

A club chooses the colour of its new building before securing any place to build it. (New editorial example, not a collected quotation.)

Meaning

A seasonal mistake is contrasted with a decision that can shape a life. The warning concerns the scale of consequences, not the impossibility of recovery.

An example · original

Before making a lasting commitment, someone pauses to consider consequences beyond the present season. (New editorial example, not a collected quotation.)

In context

The cited sense defines ପୁରୁଷ as lifetime, not generation. ଚଷା is read in the farming image; no caste-wide trait is asserted.

Literal meaning

The upper leaf falls; the middle leaf laughs; the lower leaf says, “My time is passing, brother; your time is coming.”

Meaning

The speaking leaves place laughter beside the passing of time. Read cautiously, the verse warns against treating another’s decline as something that can never reach oneself.

An example · original

Younger colleagues mock a retiring worker until they consider their own eventual retirement. (Original editorial example, not a collected quotation.)

In context

No explanatory gloss accompanies this verse. The sequence of upper, middle and lower leaves is retained exactly; no botanical species, original voice or corrected sequence is asserted.

Literal meaning

Meaning

Circumstances do not remain as they were. The animal conversation makes a simple observation about change, without saying that every change is good or bad.

An example · original

A familiar market has changed so much that a returning visitor must learn its new arrangements. (Original editorial example, not a collected quotation.)

Literal meaning

Bearing a body in the mortal world, even a god dies.

Meaning

The verse uses the strongest possible contrast: even divinity does not escape death after taking bodily form in the mortal world. Read as counsel, it asks the listener to recognise the limits of embodied life. Its force is reflective and religious, not a factual account of a particular death.

An example · original

While remembering an admired elder, a family reflects quietly on how no position or achievement makes a life endless. (Original imagined occasion.)

In context

The wording resembles a literary or devotional maxim; the saved compilation alone does not establish its original work or oral circulation. Do not present it as medical advice or use it to dismiss someone's grief.

Literal meaning

Kartiki—the cold comes at night.

Meaning

The echo between କାର୍ତ୍ତିକି and ରାତିକି makes a seasonal observation easy to remember. The line draws attention to night rather than declaring that the whole day has turned cold. In conversation it can accompany noticing a change in the air. This is a calendar-linked saying, not a forecast for every place or year.

An example · original

While sitting outside after sunset in Kartika, someone reaches for a shawl and repeats the line. (Original imagined example, not collected testimony.)

In context

Source identifies Kartiki with Kartika and labels the line Dhaga; it supplies no climate dataset or regional distribution. Distinct from existing Magha sayings.

Learning when responsibility arrives

Literal meaning

When it falls on the shoulder, one learns to play.

Meaning

Taking responsibility can force a beginner to learn the necessary skill. The compressed wording leaves the instrument unnamed; imagining a carried percussion instrument helps explain the metaphor, but does not establish which instrument first inspired it. This is encouragement to learn through doing, not a guarantee that preparation is unnecessary.

An example · original

A first-time organiser worries about arranging a neighbourhood reading session. A more experienced friend uses the saying while offering help with the practical tasks. (New editorial example, not a collected quotation.)

In context

The body carrying a burden and the hands learning a performance meet in one image. No historical link to a named musical tradition has been verified.

Literal meaning

Not to break one piece of straw into two.

Meaning

This expression makes a very small action stand for any contribution at all. Saying that someone has not done even this means they have done no work in the situation being discussed. It is an idiomatic phrase rather than a complete rhymed maxim.

An example · original

Several people clean up after a gathering while one person only gives instructions. Someone complains that the person has not lifted a finger—the comparable English idiom. (New editorial example, not a collected quotation.)

In context

Straw provides a small, light object in the verbal image. The comparison with an English idiom explains the sense; it is not a claim of translation, borrowing or shared origin.

Literal meaning

A blind person loses the walking stick once.

Meaning

Losing something relied upon can make a person more careful afterwards. The saying compresses that lesson into the loss of a walking stick. It is a figurative warning about repeating mistakes, not a factual assertion about blind people or a guarantee that a loss happens only once.

An example · original

After losing an unsigned draft, a writer starts saving a dated copy after each session. (New editorial example, not a collected quotation.)

In context

The wording uses blindness and a stick as an image of dependence on a support. Explain the image without reducing blind people to helplessness or using it to mock disability.

Literal meaning

Having cut your tongue with your own hand, who is there to speak against it?

Meaning

The sharp image points to trouble brought about by one’s own action. It challenges an attempt to shift responsibility elsewhere. It should not be used to assume that every hardship is self-caused or that someone who made a mistake no longer deserves help.

An example · original

A team ignores its own backup plan, then finds that a preventable delay has stopped the work. (New editorial example, not a collected quotation.)

In context

The bodily injury is a rhetorical image, not an instruction. The final question is rendered as a challenge to protest; it is not evidence for a historical incident.

Literal meaning

The swollen-legged person digs; as much as they dig, so much they tread over.

Meaning

The image suggests effort whose result is undone as the work proceeds. It can be used for a task that stays unfinished because each advance is cancelled by another action. Its bodily caricature should be recognized rather than turned into a judgment about disabled people.

An example · original

A document is repeatedly reformatted, and each revision removes changes that the team had already agreed on. (New editorial example, not a collected quotation.)

In context

Godara is rendered as the saying’s description of swollen legs, without diagnosing a medical condition. The interpretation concerns self-defeating work, not physical capacity or personal worth. The figurative explanation is an editorial interpretation, not a separately verified traditional gloss.

Literal meaning

Even if the dhinki goes to heaven, it will still pound paddy.

Meaning

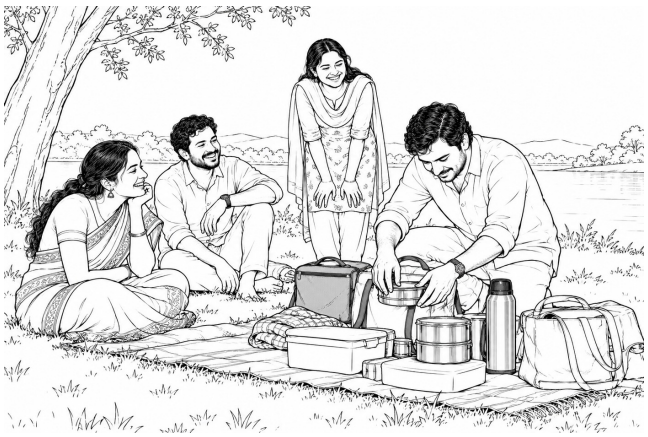
The joke gives a rice-pounding implement a grand change of address but leaves its work exactly as before. In conversation, it can tease someone who brings an old habit into a new setting, or express frustration that a change of place has changed nothing. The pointed contrast is between heaven and the same everyday task.

An example · original

On a holiday, a friend immediately starts organising everyone’s timetable just as at work. Another friend uses the saying with a laugh. (Original editorial example, not a collected quotation.)

In context

Dhinki is retained as the name of the traditional rice-pounding implement; paddy is rice still in its husk. Heaven supplies the exaggerated destination. This reading does not turn an implement’s fixed function into a claim that people cannot change, or that anyone must remain in an inherited occupation.



Imagined holiday: a new setting, the same organising habit.

Learning is a great treasure; children, acquire it.

Meaning

The verse calls learning wealth and directly addresses children. Unlike a possession handed over once, learning must be acquired through effort. The comparison gives everyday study a value beyond an immediate reward; it does not promise that education alone removes every hardship.

An example · original

A grandparent encourages a child to spend a little time learning something new each day, even when there is no examination ahead. (Original imagined occasion.)

In context

The direct address to children and paired lines make this a didactic verse. The captured compilation places it under instructive Dhaga but supplies no author or literary work; attribution must remain unresolved.

Literal meaning

Tough iron meets a persistent smith.

Meaning

The same word changes force across the line: the iron resists, while the smith refuses to give up. The dictionary explicitly marks these two senses. The image suggests meeting a difficult task with sustained effort rather than expecting it to yield immediately. It need not turn persistence into an obligation to continue every losing effort.

An example · original

A learner patiently retries a difficult passage of music instead of abandoning it after the first mistake. (New editorial example, not a collected quotation.)

In context

The craft image concerns resistance and effort; it does not describe an inherited trait of a community. Parenthetical dictionary sense numbers are omitted from the displayed wording and recorded as an editorial change.

Literal meaning

Take care of your body while carrying out your religious duty.

Meaning

The dictionary places this saying under caring for the body and health. Duty does not erase the needs of the person who performs it. In a wider everyday application, commitment and care for oneself can belong together; exhaustion is not the only measure of sincerity.

An example · original

During preparations for a community event, volunteers divide the work so everyone can take a break. (New editorial example, not a collected quotation.)

In context

The religious wording is preserved. The broader work example is new editorial application, not a medical recommendation or a rule attributed to a particular ritual.

Literal meaning

You will keep washing the sack and singing praises.

Meaning

The praise has an ironic edge. The source explains the expression as remembering someone after receiving a hard lesson from them. The repeated work of washing the sack makes that memory linger: the consequences remain after the encounter is over. It can be a rueful comment on having been taken in, rather than sincere gratitude.

An example · original

A buyer keeps repairing a supposedly excellent second-hand bicycle and ruefully remembers the seller's promises. (Original imagined occasion, not a collected quotation.)

In context

The source supplies the hard-lesson gloss but no story explaining why a sack is washed. The sack image and ironic praise are retained without inventing that missing story.

Literal meaning

If one becomes agitated instead of steady, work never succeeds. Slow water cuts stone; the rushing current fails there.

Meaning

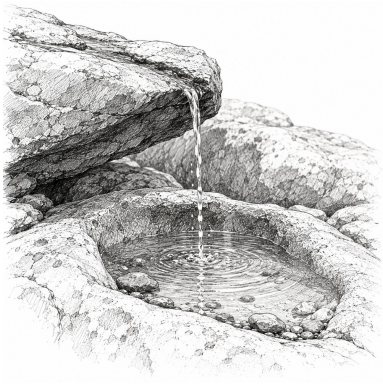
The verse gives patient work the quieter but stronger image. Water that keeps returning to the stone stands against a rush of agitation. Its supplied gloss recommends thinking and acting steadily instead of becoming angry. The absolute contrast belongs to the verse's exhortation; it is not a scientific claim that fast water cannot erode stone.

An example · original

Two people keep restarting a repair in irritation. A companion suggests checking one connection at a time and recalls the quiet water working on stone. (Original imagined example.)

In context

This four-line exhortation appears in the collection of traditional sayings, with a supplied gloss. No named poet, composition date, tune or independent evidence of proverbial circulation is established in this pass. Its four-line form is retained, not silently shortened to a slogan.



A quiet trickle accompanies the verse's image of persistence.

Literal meaning

Dig a mountain; kill a mouse.

Meaning

The work is mountain-sized, but the result is only a mouse. That sudden reduction supplies the joke. Praharaj's dictionary applies the saying to much effort yielding little or a negligible result. The expanded reading here also notices the fuss or grand promises surrounding such an outcome. It is the mismatch of scale that matters, rather than a rule that small results are always worthless.

An example · original

After several elaborate meetings, a group changes only the colour of a notice; someone quietly compares the result to a mouse. (Original imagined example, not collected testimony.)

In context

The dictionary explicitly labels this a proverb and supplies the effort-versus-result gloss. The joke about scale and the imagined meeting are editorial expansions. No originating incident or borrowing history is established.

Literal meaning

Eat the gruel, or shoo the flies?

Meaning

A meal is ready, but the flies will not leave it alone. The question catches the frustration of two necessary tasks demanding attention at once: attending to one interrupts the other. It gives that predicament a small, comic scene rather than blaming someone for not doing everything at the same time. The dictionary explicitly applies the saying to two unavoidable tasks arising together.

An example · original

At a small event, the person serving lunch is also asked to check arriving guests against a list. They use the question with a laugh and ask another volunteer to take one task. (Original imagined example, not collected testimony.)

In context

Jau is a grain gruel. The printed dictionary pictures flies, not fish; the online Wiktionary transcription drops the final vowel sign in that word. The meal scene and application above expand the dictionary's stated two-task gloss. No particular household, occupational custom or originating incident is established.

Literal meaning

The analogy of ants eating up the jaggery store.

Meaning

The sweet store is something the ants will keep returning to. The dictionary applies the image to work that must always be guarded carefully against an enemy. Its emphasis is continuing exposure, rather than a single finished loss. Unlike putting an ant in charge of the store, this analogy does not appoint the eater as guardian.

An example · original

A club restores its noticeboard after repeated deliberate damage. When someone says one repair has settled the matter, another member uses the jaggery-store analogy to explain why they still need to watch it. (Original imagined use.)

In context

The source says enemy, not merely accident or ordinary wear. The new example therefore retains deliberate interference. Note1 in this same source is the different guardian/conflict-of-interest analogy; keep the two separate.

Literal meaning

The dheṅki falls thump-thump; service to the sahib is very hard; sweat streams.

Meaning

The heavy beat of the pounding implement is answered by the sound of streaming sweat. Between them comes the complaint that service to the sahib is hard. Sound makes the labour felt before any abstract judgment is offered. The line can be read as a rhythmic complaint about demanding work, but the quotation does not identify an employer, worker or event. A present-day speaker may borrow its exaggerated beat to describe a tiring task; that is a new use, not evidence of a particular historical labour arrangement.

An example · original

Original imagined example: After repeatedly moving heavy boxes for a demanding organiser, a volunteer recites the line to a friend, tapping out “ଧମଧମ.” The friend hears both the joke and the complaint about the workload.

In context

Literal meaning

If one makes an effort, one finds a gem.

Meaning

The small change from jatna, effort, to ratna, gem, gives the line its compact promise. The valuable result is pictured as something worth looking and working for. A speaker can use the conditional line to encourage another attempt when a task seems unrewarding. This encouraging use follows the wording and the dictionary definition of trying; it is not evidence that effort always succeeds. In our reading, the gem gives effort a direction without making failure a verdict on someone's worth.

An example · original

Original imagined example: Two friends are trying to mend a loose chair. After the first adjustment fails, one says "ଯତ୍ନ କଲେ ରତ୍ନ ମିଳେ" and suggests checking the other joint. The line encourages a more careful second attempt rather than promising that the chair must be repairable.

Literal meaning

Wrongfully gained wealth grows greatly, but disappears with its roots.

Meaning

The image contrasts rapid growth with loss at the root. Wealth obtained dishonestly may look impressive, yet the conduct behind it can endanger the whole household or enterprise. This is a moral warning about how gain is obtained, not a reliable prediction that every dishonest person will become poor.

An example · original

A trader is tempted to falsify weights for a little extra profit. An older colleague uses the saying to warn that losing customers' trust could destroy the business. (New editorial example, not a collected quotation.)

In context

The rhyme of ବହୁତ and ସହିତ gives the warning a memorable close. The root image suggests losing the foundation, not merely the most recent gain. A version appears as the opening proverb of the1893 collection.

Literal meaning

The head cannot earn; the mouth wants delicacies.

Meaning

The line sets the head’s inability to earn against the mouth’s demand for tasty food. It can rebuke expectations of luxury that do not match available means or contribution. Its tone is sharp and can be hurtful when applied to someone whose circumstances are outside their control.

An example · original

A group has agreed to a modest outing, but one member insists on an expensive feast while refusing to contribute. Another uses the saying to question that mismatch. (New editorial example, not a collected quotation.)

Meaning

The line connects limited means with the distress of being unable to meet needs. Its compact rhyme can express sympathy for someone trying to make a small sum cover many demands. It need not be read as an accusation of greed or a judgement about character.

An example · original

A family is weighing school expenses against a repair bill; someone uses the line to acknowledge the pressure. (New editorial example, not a collected quotation.)

Literal meaning

To go from high prices into famine.

Meaning

A change meant to escape difficulty leads into something worse. Here କାନ୍ତାର is the dictionary’s famine sense, not its separate forest sense.

An example · original

A shop changes to a cheaper supplier, then loses more because deliveries repeatedly fail. (New editorial example, not a collected quotation.)

In context

The food-scarcity image supplies the comparison; no particular famine or historical event is identified.

Literal meaning

If one sits and consumes, even the river's sand runs out.

Meaning

Even a large store can be exhausted if it is continually used without replenishment. The exaggerated sand image makes the scale of the reserve irrelevant.

An example · original

A club repeatedly pays expenses from its reserve but collects no new contributions. (New editorial example, not a collected quotation.)

In context

Meaning

An example · original

In context

The source gloss concerns a useful thing failing to reach the appropriate person. The fruit-and-crow image is proverbial, not a biological claim about every crow.

Literal meaning

What can a boat do when the river dries up?

Meaning

A useful boat cannot replace the water it needs. The image invites a distinction between ability and the conditions that make ability useful. When an essential resource disappears, blaming the tool or the person alone may miss the real obstacle. This wider application is an editorial interpretation of the quoted saying.

An example · original

A skilled team cannot finish a repair until the necessary spare part arrives. (New editorial example, not a collected quotation.)

In context

The source supplies the complete example under a river drying up, but no historical origin or detailed figurative-use account. Similar dependency themes elsewhere in the collection do not make this wording an exact duplicate.

Literal meaning

Like the temple’s front hall exceeding the temple itself.

Meaning

The dictionary explicitly applies this architectural comparison to expenditure exceeding income. What should be a supporting part has grown beyond the thing that supports it. The image asks us to notice proportion in a plan, especially when its surrounding costs threaten to consume more than the available means.

An example · original

The decoration budget for a small gathering grows larger than the money available for the entire event. (New editorial example, not a collected quotation.)

In context

The comparison follows the source’s figurative explanation; it does not establish a universal architectural rule or identify a particular temple. The unusual source spelling ବିଳିଯିବା remains unchanged.

Literal meaning

A bati of cultivation, yet fasting every day.

Meaning

The joke places a substantial-looking agricultural resource beside an empty stomach. The source explains it as plenty of rice but too little cooked food. Possession and actual provision have come apart: what looks sufficient has not become something usable. The saying does not identify one universal cause for that mismatch.

An example · original

A community room has cupboards full of donated supplies, but nobody can find the materials needed for today's class. Someone recalls this mismatch between plenty and use. (Original imagined example.)

In context

Bati is retained as the source's land-measure term; no regional conversion is supplied. The witness spells the daily expression ନୀତି, which is preserved. The accompanying gloss, not an invented household story, supports the reading.

Literal meaning

Pumpkin vine! A son of a grand household, so miserly!

Meaning

The rhyme of ଡ଼ଙ୍କ and ରଙ୍କ gives the complaint a teasing snap. A grand household suggests resources, yet its son behaves as though even a small contribution is too much. The joke exposes that mismatch between the family's impressive image and the person's stinginess. Here the dictionary places ରଙ୍କ under "miserly", not "poor"; lack of generosity and lack of money must not be confused.

An example · original

At a shared picnic, someone boasts about the size of his family home but refuses to contribute even a few cups. A friend says, "କଖାରୁଡ଼ଙ୍କ ! ବଡ଼ଘରପୁଅ ଏଡ଼ିକି ରଙ୍କ !" The teasing targets his conduct, not someone unable to afford a contribution. (Original imagined example.)

In context

Source sense1 supports stinginess. The household label is the speaker's taunt, not a rule about class.

Literal meaning

Does the needy person’s wish decide the meal?

Meaning

Wanting a meal and being able to choose it are different things. The source explains that someone dependent on another’s food receives what the giver wishes to provide. The question can expose how little say the recipient has. Its tone matters: it may describe that constraint sympathetically, or dismiss the person’s wishes. This reading draws attention to limited choice without endorsing that dismissal.

An example · original

At a relief kitchen, a family asks whether a different meal is available, but only one prepared dish can be served. Afterwards a recipient says, “ରଙ୍କ ଇଚ୍ଛାରେ କି ଭୋଜନ?” to express having no choice, not to praise the arrangement. (Original imagined example.)

In context

Historical need/dependence language; do not turn it into a demand for unquestioning gratitude.

Literal meaning

In such dire poverty, yet eating hot food at both meals!

Meaning

The dictionary places this saying under extreme poverty. The line then sets that condition beside eating hot food at both meals: its surprise lies in the contrast. It can be read as a teasing challenge to a description of hardship, though the dictionary does not supply a separate use gloss. Cooking again costs fuel and work; a literary passage about one cooked-rice meal and one meal of pakhala helps explain the image. That context does not make hot food a reliable measure of anyone’s means.

An example · original

During an imagined discussion of household expenses, one person complains that nothing is affordable. A companion sees the freshly cooked evening meal and quips, “ଏଡ଼େ ମଲାଠେଇଁ ଦିଓଳି ବି ତତଲା ଖିଆ!” The reply comes back: “A hot meal does not tell you what we have had to go without.” (Original imagined use, not collected testimony.)

In context

Recorded as ଢଗ under ମଲା, noun2, printed Praharaj page6322. Preserve the social sting rather than recasting it as a universal lesson about extravagance. The source establishes wording and the poverty sense; the teasing application is editorial. The separate Rudrakshya passage clarifies meal/fuel language but neither quotes nor explains this proverb. No first-use, popularity or community-wide endorsement is claimed.

Literal meaning

If a mouthful falls from an elephant’s mouth, an ant has food for a hundred years.

Meaning

The joke makes the same scrap almost nothing to one creature and an enormous provision to another. The dictionary extends the contrast to an elephant-like person leaving a small amount that can sustain many ant-like lives. The hundred years is the saying’s extravagant measure of scale, not a feeding calculation. The comparison can make an overlooked remainder suddenly look substantial.

An example · original

A large printing shop offers its unused paper offcuts to a small drawing club. Seeing how many sketchbooks they can make, a member quotes the elephant-and-ant analogy. (Original imagined use.)

In context

The dictionary explicitly interprets unequal scale through elephant-like and ant-like figures. This records a comparison, not a claim that people have unequal worth or a historical account of patronage.

Literal meaning

Rana, forest and thatching grass—the king of Banki answers with “my dhudhua brinjal.”

Meaning

The opening piles up three resources with a quick rhyme; the reply sets one unassuming vegetable against them. The dictionary explains the joke through a comparison of revenues: it says Dampara’s river fish, forest products and thatching grass brought less than Banki’s tax on the silted land where these brinjals grew. That explanation gives the king’s answer its boastful force: what looks like a modest crop may be the more valuable resource. This is the dictionary’s account, not a revenue comparison independently established here. Its conversational appeal lies in the surprise of the small-looking answer to a grand list.

An example · original

Original imagined example: At a school fundraiser, one group lists its elaborate stalls. Another points out that the plain seedling stall earned the most. A teacher quotes the brinjal line and explains the dictionary’s comparison, using it to tease the assumption that the grandest display must bring the best result.

In context

Banki and Dampara belong to the source’s regional explanation. No reign, date, actual royal conversation, verified revenue figure or origin event is claimed. The modern fundraising application is editorial; the dictionary’s botanical description is not a current taxonomic certification.

Literal meaning

Among the ornaments, a neem twig has a place.

Meaning

The line puts a small ordinary twig among things normally valued for adornment. A separate dictionary entry explains that a piece of neem twig could occupy an ear or nose piercing when an ornament was absent. That historical description makes the juxtaposition less random: the twig stands in the place an ornament would otherwise occupy. It does not, by itself, settle whether every speaker intends affection, modest pride or a dismissive comparison. One editorial application is to notice an unassuming substitute that serves a purpose among more impressive things. The source's old bodily practice is context, not a recommendation to reproduce it.

An example · original

Original imagined example: At a music rehearsal, several people arrive with polished music stands. One singer uses a plain homemade book support and jokingly quotes the line about the twig among ornaments. The comparison concerns the modest substitute, not the singer's worth. This is an editorial application, not a sourced musical tradition.

Literal meaning

The piece-counter uses up twice as much.

Meaning

The dictionary’s piece-counter is someone so miserly with food that each cut piece is counted before it is handed to the cook. The saying answers that anxious control with a reversal: the supposed saver ends up using twice as much. “Twice” gives the rebuke its bite; the source supplies no measured account or explanation of how the loss occurs. One editorial application is to a petty economy whose inconvenience creates more expense. The target is grasping control, not careful budgeting when resources are genuinely limited.

An example · original

Original imagined example: For a shared event, an organiser insists on buying too few paper cups to save a little. When they run out, a volunteer makes a second trip and pays more for a small packet. Someone quotes the saying about the piece-counter. The cups and extra trip are an invented illustration, not the dictionary’s story.

In context

The source explicitly defines food-related miserliness. The broader petty-economy application is editorial. No quantitative spending law, nutritional instruction or judgement of people living in poverty is implied.

Literal meaning

While it was there, a rag; once lost, a fine cloth.

Meaning

The object changes in the speaker’s estimation after it disappears. What was dismissed as a torn rag suddenly becomes fine cloth worth lamenting. The joke catches the difference between the care something received and the value claimed for it afterwards. In an everyday application, it can tease exaggerated regret over an object or opportunity that was taken for granted. That application is our close reading of the contrast; the dictionary supplies the saying and the cloth vocabulary, not an account of its first use.

An example · original

Original imagined example: A brother has called an old scarf useless for months. When he misplaces it, he calls it his finest scarf. His sister laughs and quotes the saying, reminding him how he spoke about it yesterday.

In context

27001 defines torn cloth.99210 defines the compound ଲହୁଣିଆଁ ମାଠ as a fine soft shawl/cloth, supporting a bounded cloth contrast, not a particular fibre, weave or historic price. Retrospective valuation is editorial close reading. No origin or general rule about grief is claimed.

Literal meaning

Free, yet costly.

Meaning

The dictionary gives a specific occasion for this short taunt: someone receives something without paying and still calls it expensive. The absurd price complaint does the work. A speaker can use it to prick dissatisfaction that forgets what was actually paid. It is not the different saying that a free offer always carries a hidden cost; neither does it settle whether the thing is useful or whether the recipient may refuse it. Its bite lies in this particular mismatch between receiving gratis and complaining about the price.

An example · original

Original imagined example: A club gives away its spare notebooks. Someone accepts one, then jokingly complains that it was too expensive. The organiser replies, “ମାଗଣୁ ମହର୍ଗ,” and both laugh at the impossible bill.

In context

The supplied gloss explicitly identifies the target. Do not recast it as a hidden-cost maxim or an instruction that recipients must be grateful for anything. Meaning is adapted from the dictionary gloss; example is original.

An imagined price complaint over a freely offered notebook.

An imagined livelihood, carried with dignity.

Literal meaning

Feed yourself; there is no fault.

Meaning

The rhyme answers an accusation before it grows: maintaining oneself is not in itself a fault. The dictionary explains “feeding the belly” as supporting one’s life. In an ordinary conversation, the line can defend necessary work against snobbery about its status. That reading concerns the dignity of earning a living, not permission to harm others for gain. The short source supplies no trade, worker or occasion, so a particular occupation belongs to an illustrative example rather than to the saying’s documented history.

An example · original

Original imagined example: A student is embarrassed that acquaintances have seen her selling repaired furniture to support her studies. Her aunt quotes the saying, affirming the work rather than measuring its social prestige.

In context

Livelihood is the explicit lexical sense. Dignity against occupational snobbery is editorial application, not a named movement, historical event or licence for wrongdoing.

Literal meaning

A torn umbrella: taken to market, it could have brought money.

Meaning

The dictionary spells out the small possibility: the torn umbrella could be sold for money if taken to market. Damage has not automatically made it valueless. The conditional ending makes the value depend on taking it to market; it could sound practical or rueful, depending on the occasion. Our present-day reading asks whether something dismissed as useless still has an honest use or exchange value. It is not a guarantee that every broken object will sell, and the defect should not be hidden from a buyer.

An example · original

Original imagined example: During a clear-out, someone is about to discard an old umbrella whose frame can still be used. A friend quotes the line and suggests offering it openly as a damaged item to someone who repairs umbrellas.

In context

The dictionary labels this a Sambalpur form and gives the selling gloss. No standardisation of ହାଟ୍ଟେ or ହେତା, no market-price claim or fraudulent-sale advice. Practical application is editorial.

An imagined possibility for a damaged umbrella.

Literal meaning

You move about in style on another's wealth; when it is taken away, you die of shame.

Meaning

The first half gives someone room to move and make a show; the second suddenly takes that support away. The dictionary defines the headword as moving to and fro, while the verse puts that movement on another person's wealth. Read as a taunt, it catches the embarrassment of displaying what one cannot claim as one's own. The closing “die of shame” is exaggerated reproach, not a literal instruction. Our wider reading concerns borrowed display and insecure pretension, not the worth of people who receive help.

An example · original

Original imagined example: Someone poses with a friend's expensive camera and lets others think it belongs to them. When the friend asks for it back, another friend quotes the saying softly. The joke concerns the false impression, not borrowing a camera.

In context

The dictionary labels the headword Sambalpur; this is a source label, not proof of exclusive regional origin. The display reading is editorial close reading, not an independently supplied traditional-use gloss.

An imagined moment when a borrowed camera is requested back.

Literal meaning

There are sixty kahans for penalties, but not a small cowrie amount for devotion to Hari.

Meaning

The verse sets a large expense beside a tiny amount refused. Its religious contrast is explicit: money can be found for a penalty or an expense one is forced to bear, yet none is available for devotion to Hari. The dictionary's separate definition of taṇḍa includes fines and compelled expenditure; it does not tell us what offence, if any, lies behind this line. Our reading hears a reproach about priorities, made memorable by the unequal sums. That reading preserves the devotional voice without making spending on worship a test of anyone's goodness.

An example · original

Original imagined example: Two friends discuss someone who readily pays repeated late fees but says there is nothing to spare for a small devotional gathering they had promised to support. One quotes the line as a comment on those priorities. The scene is invented and is not a demand that anyone fund religious activity.

In context

The primary headword explains a large sum in an older cowrie vocabulary. The lexical taṇḍa source is context-only, not a second witness of the saying. No exact modern currency conversion, offence, historic event or duty to donate is asserted.

Literal meaning

From a game of jhimiti to the Mahabharata.

Meaning

A small disagreement grows into an outsized conflict. The Mahabharata provides a culturally recognisable scale of conflict. The expression is not evidence that the epic war literally began with this named game, and the game's precise historical rules have not been established here.

An example · original

Two friends disagree over a turn in a game; soon several families are arguing. A neighbour uses the saying to describe how far the quarrel has grown. (New editorial example, not a collected quotation.)

In context

ଝିମିଟି is retained rather than replaced by an invented modern game. The contrast is between a modest starting point and epic-scale escalation.

Literal meaning

Good of you to come, friend; there is nowhere to sit. Go back by the very way you came.

Meaning

The opening sounds hospitable, but the ending cancels the welcome. The humour lies in that sudden reversal: someone offers warm words while making it plain that the visitor is unwanted. Used pointedly, it exposes courtesy that provides no actual welcome.

An example · original

A club warmly invites suggestions but immediately dismisses every visitor's proposal; an observer recalls this saying. (New editorial example, not a collected quotation.)

In context

The repeated address to a friend sharpens the irony. The example extends that verbal pattern to another setting; no historical hospitality custom is being asserted.

Meaning

The expression portrays someone claiming closeness everywhere while carrying damaging talk between people. The source gloss stresses pleasing both sides and creating discord. Its target is manipulative familiarity, not genuine friendship across households.

An example · original

A neighbour tells each household that they alone have her sympathy, while repeating complaints from the other. (New editorial example, not a collected quotation.)

Literal meaning

Oh mother, I am undone! I went all around the village; no one said, “Sit down.”

Meaning

The complaint turns a small invitation into the measure of being welcomed. After going everywhere, the speaker has not received even that acknowledgement. The exaggerated opening can make the hurt comic, while the last line reveals the modest courtesy that was missing.

An example · original

A visitor calls on several acquaintances and feels brushed aside by all of them, then recounts the experience with this lament. (New editorial example, not a collected quotation.)

In context

The source places it under a gloss about not receiving due respect. The dramatic ମଲି is rendered as an exclamation, not a report of death. No universal village hospitality rule is inferred.

Meaning

People who have known someone from everyday village life may dismiss that person instead of recognizing their qualities. The belittling description makes that dismissiveness audible. The saying can challenge a narrow local judgment without endorsing the insult directed at the bride.

An example · original

A skilled local storyteller receives appreciation elsewhere while neighbours still speak only of childhood mistakes. (New editorial example, not a collected quotation.)

On meeting, says nothing; without seeing, will not drink water.

Meaning

The contradiction is the joke: someone seems distant in person but cannot settle when the other is absent.

Literal meaning

Each place has its particular ways; each river has its bends.

Meaning

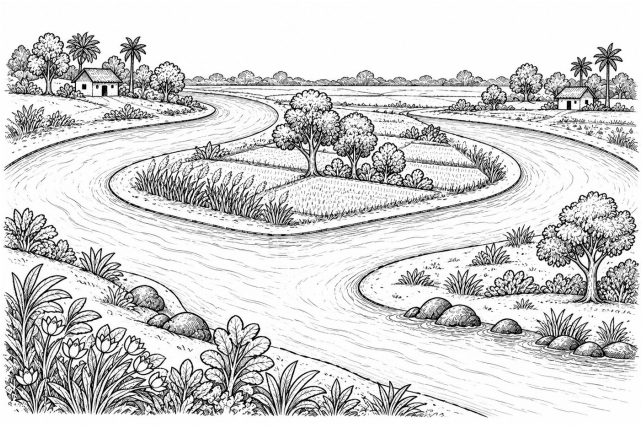
A way of doing things that feels ordinary in one place may differ elsewhere. The river image makes local variation easy to picture. The saying invites attention to the place you are in, without declaring every local practice beyond question.

An example · original

A visitor notices that a neighbouring village arranges its shared meal differently and asks how the local arrangement works. (New editorial example, not a collected quotation.)

In context

The example appears under locality in the dictionary. A separate lexical entry gives particular and differing customs among the senses of ଫାଙ୍କ; that supports the reading used here.



Each bend reveals another place and its ways.

Literal meaning

A clap cannot sound with one hand alone.

Meaning

Some things require a response or a shared effort. The image of two palms meeting makes that dependence immediate. It can invite cooperation; it should not be used to assume that both sides bear equal blame for harm.

An example · original

One person proposes a shared reading group; the others must also make time for it. (New editorial example, not a collected quotation.)

In context

The dictionary explicitly labels this example a dhaga under clapping. The explanation here is editorial, not a recorded account of its first use.

Literal meaning

Meaning

The contrast criticises conspicuous favour for one set of relatives while someone close goes without. It questions unequal care, not the worth of either relationship.

An example · original

A host arranges expensive gifts for guests while ignoring a sibling’s urgent need. (Original editorial example, not a collected quotation.)

Chillies in the woman gardener's hand, a flower garland in the gardener's hand: each person knows their own thoughts; how would another know them?

Meaning

Literal meaning

Ah, that home is like Vaikuntha, where mutual affection remains unbroken.

Meaning

The verse imagines an ideal home through the affection people show one another. The important word is mutual: care is not demanded from just one person. Its heavenly comparison celebrates a quality of relationships rather than the size or expense of a house.

An example · original

Family members share chores and make time to listen during a difficult week; someone says this mutual care is what makes the house a home. (Original imagined occasion.)

In context

Vaikuntha supplies the religious comparison. This is an ideal expressed in verse, not evidence about every household or a reason to remain in a harmful relationship. No original author or work is identified by the captured entry.

Literal meaning

Apai has got a child; the whole village is in a commotion.

Meaning

A private event becomes everybody's noisy business. The source introduces this saying as something used when someone makes too much of a display. Its joke lies in the size of the response: one household's news seems to shake an entire village.

An example · original

A small household purchase is announced repeatedly to every neighbour, with more ceremony than the occasion seems to need. (Original imagined occasion.)

In context

The source explicitly supplies a display/show-off context. Apai is retained as an unidentified source designation; no historical person, kinship role or gender is inferred. The criticism is of disproportionate display, not of celebrating a child.

Literal meaning

I quarrelled with my nephew; I might have received a generous portion of mahura curry, but my own mouth spoiled it.

Meaning

The speaker looks back on a quarrel and the food they might otherwise have enjoyed. The dictionary defines ମେଞ୍ଚାଏ as a large portion of food. Here the humorous self-accusation turns an abstract consequence of quarrelling into a lost meal: the mouth that wanted food also said the words that cost it. This is a close reading of the example, not a reconstructed family incident.

An example · original

After needlessly snapping at a friend, someone regrets spoiling the relaxed lunch they had planned together. (Original imagined example, not collected testimony.)

In context

Mahura is retained as a named curry; no ingredients, temple recipe or historical household are inferred. The reading concerns needless quarrelling, not an obligation to remain silent about mistreatment.

Literal meaning

How would the back know the belly's pain?

Meaning

Even two parts of the same body do not occupy the same place. The question gives private suffering a simple image: being near someone is not the same as feeling what they feel. It can ask a listener to be less certain about another person's troubles. That reading need not mean that understanding or help is impossible.

An example · original

A caregiver hears a neighbour dismiss their exhaustion as an easy task and replies with the question before explaining the work involved. (Original imagined example, not collected testimony.)

In context

କହିଲେ ପରିବାରର ଲାଜ, ନକହିଲେ ପରିବାରର କ୍ଷତି—ଦୁଇ ପଟେ ଚିନ୍ତା। ଚୁପ୍ ରହିଲେ ମାନ ରହିଯିବ ବୋଲି ଲାଗିପାରେ, ହେଲେ ଭିତରର ଅସୁବିଧା ବଢୁଥାଏ। କୁଳ ଭାସିଯିବାର ଛବି ସେହି ବିପଦକୁ ତୀବ୍ର କରେ। ଏହା ଦ୍ୱିଧାର କଥା; ପରିବାରର ନାମ ପାଇଁ ଭୁଲ ବା ଅନ୍ୟାୟ ଲୁଚାଇବାର ନିର୍ଦ୍ଦେଶ ନୁହେଁ।

Literal meaning

If I speak, the family is ashamed; if I do not, the family is being swept away.

Meaning

Both choices carry a cost. Speaking exposes something embarrassing; remaining silent allows the damage to grow. The image of a family being swept away makes silence seem less safe than it first appears. The saying voices a dilemma, not a command to conceal wrongdoing for the sake of reputation.

An example · original

A family member discovers mounting unpaid bills and uses the saying while deciding how to begin an uncomfortable but necessary conversation. (Original imagined example, not collected testimony.)

In context

Source defines family and gives the complete dilemma; the bills example is new. No particular household, historical event or duty to hide harm is asserted.

Literal meaning

When she receives encouragement or a promise from her husband, she gets ready to go to her father’s home.

Meaning

The local expression ଘଇତାବୁକୁ is defined as encouragement or a promise from a husband. The saying follows that assurance with the quick, visible response of getting ready to visit her parental home. The paired endings give the movement from words to preparations a light, teasing rhythm. The source does not tell us whether the promise concerns travel, money or something else, so none of those details is treated as fixed. Read as a conversational scene, it catches the eagerness with which a welcome assurance can become action.

An example · original

Original imagined example: A woman has been hoping to visit her parents. Her husband offers to take over their shared errands that weekend, and she immediately starts packing. Her sister smiles and quotes the saying at the speed of the preparations. The offered help is an invented detail of this example, not part of the historical wording.

In context

The dictionary marks the headword as a rural figurative expression. The saying presents a husband-and-wife situation; it does not establish a rule that a woman needs permission to visit her family. No particular region, marriage custom or historical incident is inferred.

An imagined promise of help, followed by eager preparations.

Literal meaning

Why keep looking at me? My charming one is more beautiful than you and could keep you as a servant.

Meaning

The line answers someone who keeps looking at the speaker by praising another person as more beautiful. The dictionary explains “keep as a servant” here as figurative superiority in wealth or qualities, so the comparison is not a report of employment. One possible performance is a proud rebuff to an admirer: the speaker boasts that a favoured person would far outshine this supposed rival. Neither admiration nor a romantic relationship is fixed by the source gloss, however. The repeated address gives the comparison a personal, theatrical edge. Its status hierarchy is part of the rhetoric, not a measure of anyone’s human worth.

An example · original

Original imagined example: During a light-hearted drama rehearsal, one character keeps posing to catch another character’s eye. The other quotes this line, praising someone supposedly more beautiful. The performers choose to play it as a proud rebuff to an admirer; that relationship is invented for this scene, not established by the dictionary. They treat the employment comparison as exaggeration rather than a reason to mock an occupation.

In context

The source supplies a figurative status comparison, not a named romance or biographical episode. Charming one renders ବିନୋଦିଆ without fixing a romantic relationship; the speaker’s gender and any historical characters are not established. The employment hierarchy should remain visible as rhetoric without being endorsed.

An imagined rehearsal: a boast meets a pointed reply.

Literal meaning

Give the old bull coarse juannia grass; whether it eats or not, let it loose and come away.

Meaning

The food is offered, but whether the old animal can use it is treated as no concern of the giver. The dismissive ending is the revealing part: doing something that resembles care becomes an excuse to stop caring about the outcome. The source defines the grass as coarse and tough; it does not give a separate figurative gloss. Our reading hears a picture of perfunctory attention, especially when someone's needs have changed. Quoting it critically can draw attention to neglect rather than recommend the conduct it describes.

An example · original

Original imagined example: A club sends a complicated online form to a member who has already said they cannot use that system. When someone says "We sent it, so our job is done," another member quotes the saying to challenge that indifference and offers to help complete the form.

In context

The analogy is read critically, not as animal-care advice or an assertion that older people have less value. The source spelling ଜୁଆଁଣିଆ in the quoted line is retained although the headword has ଜୁଆଁଣିଆ. No species or agricultural history is inferred.

An imagined scene of care offered without checking whether it helps.

Literal meaning

Thorny phiriki, did I know you had such qualities? Why did you not tell me in time? You held me up like a flower, then flung me down.

Meaning

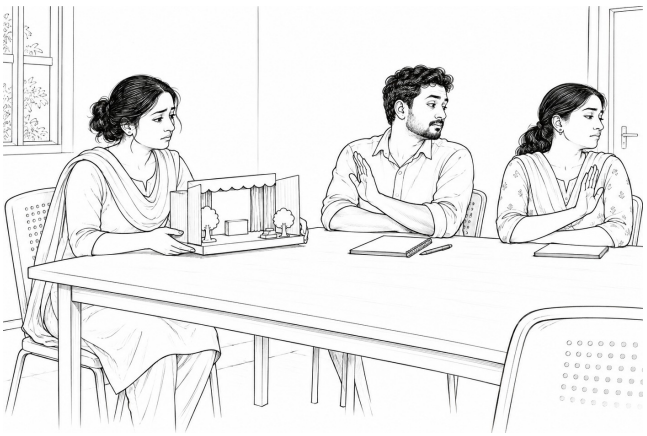
The voice turns on someone who first treated the speaker tenderly and then hurtfully reversed that treatment. “Such qualities” can be heard as an ironic compliment: the ending reveals why the earlier admiration has soured. The linked dictionary entry identifies phiriki as a thorny plant; the flower and the thorn therefore offer a sharp contrast without requiring a story about a particular person. The main entry supplies the words but no separate account of their occasion. Our conversational reading is a reproach for praise or support followed by abrupt rejection, not proof of a named betrayal or romance.

An example · original

Original imagined example: A theatre group warmly praises a volunteer’s idea and asks them to prepare it. At the next meeting, the same people dismiss it without explanation. The volunteer quotes the saying to point out that sudden reversal. The theatre setting is invented, not the source’s occasion.

In context

The source labels this a saying; its linked lexical entry supplies only the thorny-plant meaning. No species identification, medicinal property, actual physical assault or fixed romantic relationship is claimed. Flower/thorn contrast and the modern conversational application are editorial readings.



An imagined rehearsal: a prepared idea meets an abrupt change of attitude.

Literal meaning

Sweet-speaking Radha: when one goes to the house, she does not speak; on the road, such affection.

Meaning

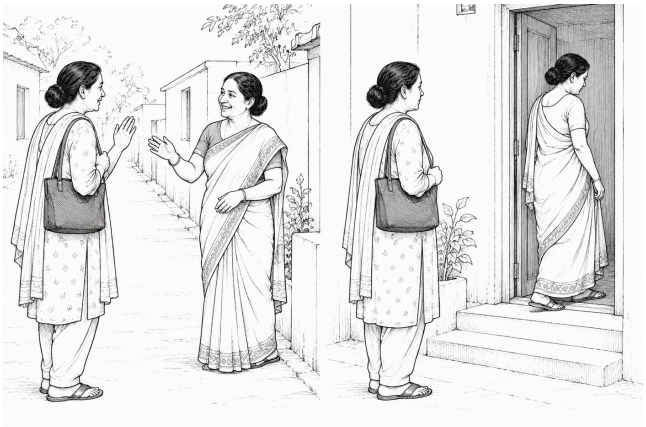
The praise in “sweet-speaking” is undercut by the change of setting. On the road there is a warm reception; at the house there is not even conversation. The linked dictionary definition includes flattering words that conceal a different intention, so the contrast is sharper than a simple difference between a busy and a free moment. The line can tease or reproach warmth that seems to depend on where it is displayed. It does not tell us who visits the house or what relationship the visitor has to Radha. Our present-day application concerns inconsistent welcome, not a rule about women or a story about a deity.

An example · original

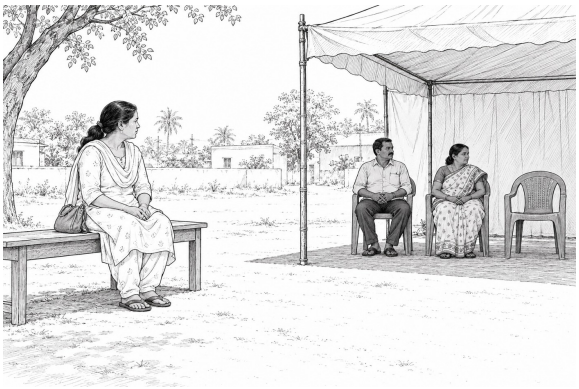
Original imagined example: A neighbour repeatedly welcomes someone warmly at the market and invites them to drop by. When the visitor arrives at the agreed time, the neighbour will not acknowledge them. Later, the visitor quotes the saying to a friend with a rueful laugh. This invented scene illustrates the contrast; it is not the source’s occasion.

In context

Radha is the name in the wording; no mythological identity, romance or biography is established. 8859 is lexical context only, not another full-saying witness. The visitor and relationship remain unspecified. Teasing force follows the source contrast and linked flattering-speech definition; contemporary situation is editorial.



An imagined contrast: warmth on the road, silence at the door.



An imagined moment: a place in the shade, but no invitation.

Literal meaning

I sit in the fierce sun; they do not say, “Come into the shade.”

Meaning

This voice complains of a small kindness withheld. The speaker is exposed to fierce heat, while the wished-for response is only an invitation into shade. The line makes neglect tangible without telling us who the others are or why they remain silent. Read conversationally, it can express the hurt of being overlooked when someone could easily acknowledge a difficulty. That broader use follows the image; it is not a documented original occasion or a claim that every unspoken offer is deliberate cruelty.

An example · original

Original imagined example: After helping arrange an outdoor meeting, a volunteer remains in the sun while the others sit under the canopy. Later the volunteer quotes the line to a friend, describing the hurt of not being invited to join them.

In context

ରୋହନ୍ତ୍ର is explicitly glossed unbearably hot. Speaker, place and relationship are unnamed. Neglect is a reading of the direct complaint; no heat-safety instruction, biography or historical scene is inferred.

Literal meaning

Unasked-for goods have no colour.

Meaning

The dictionary explains “no colour” here as a lack of value: an unsolicited thing is not valued. The line points to reception rather than a defect in the object. Something offered without being requested may be overlooked precisely because no effort was made to seek it. Our reading treats that as an observation about undervaluing what arrives easily, not proof that unsolicited help or gifts are worthless. It can sound rueful from the giver or self-mocking from someone who recognises their own neglect.

An example · original

Original imagined example: A colleague sends useful notes before anyone asks. They remain unread until the team pays for similar guidance elsewhere. The colleague quotes the saying with a rueful smile about the notes that arrived too easily.

In context

The dictionary labels the headword Sambalpur; that is a source classification, not proof of exclusive regional origin. The supplied gloss concerns value, not literal colour quality. Modern workplace use is editorial.

An imagined offering left unnoticed.

ଦିଆକୁ ଦିଆ, ଅଦିଆକୁ ଦୁଆର ଦିଆ

Giving, and closing the door

ପ୍ରଥମେ “ଦିଆ”ରେ ଦେବାର କଥା, ଶେଷରେ “ଦୁଆର ଦିଆ”ରେ ବାଟ ବନ୍ଦ କରିବାର କଥା ଆସୁଛି| ଯିଏ ଦିଏ ତାକୁ ଦିଅ, ଯିଏ ଦିଏନାହିଁ ତାହା ପାଇଁ ଦୁଆର ବନ୍ଦ—ଏହି ହିସାବଟି କଥାରେ ଧରାପଡ଼େ| ଆଦର ଓ ସାହାଯ୍ୟ ଯେତେବେଳେ କେବଳ ପ୍ରତିଦାନ ଉପରେ ନିର୍ଭର କରେ, ଆମ ପଢ଼ାରେ ତାହାର ସଂକୀର୍ଣ୍ଣତା ମଧ୍ୟ ଦିଶେ| ଏହାକୁ ସମର୍ଥନ କରି କୁହାଗଲା କି କଟାକ୍ଷରେ, ଅଭିଧାନର ଛୋଟ ଉଦାହରଣ ସେ ପ୍ରସଙ୍ଗ ଦିଏନାହିଁ|

Literal meaning

Give to the giver; close the door to the non-giver.

Meaning

The repeated sound of “ଦିଆ” changes its force at the door: giving becomes shutting someone out. Read as a compact rule of reciprocity, the line divides people according to whether they give. It can expose the calculating side of an exchange in which welcome depends on a return. Our reading leaves room for a speaker to endorse that bargain or mock it; the short dictionary quotation supplies no performance setting. It should not be turned into a rule that someone unable to contribute deserves exclusion.

An example · original

Original imagined example: A committee suggests helping only members who donated last year. Another member quotes the saying critically, then asks what happens to neighbours who had nothing to give.

In context

ଦୁଆର ଦିଆ is explicitly glossed shutting the door against a person. Reciprocity and the critical example are editorial close reading, not a supplied moral gloss or universal custom.

Literal meaning

Is this the former Kahnei? With a fine soft shawl on the shoulder, does he recognise people?

Meaning

The question contrasts a remembered person with the way he now behaves. The fine shawl becomes the visible sign beside a failure to recognise others. Our reading hears a teasing accusation that improved appearance or standing has brought social distance. The line does not tell us that the cloth itself changes character, or that everyone whose circumstances improve becomes proud. Its force is directed at the particular person being addressed through this pointed question.

An example · original

Original imagined example: After a promotion, a friend stops greeting the people who used to share lunch with him. One of them quotes the saying in a private conversation, teasing the new distance rather than the friend’s clothes.

In context

The source labels the headword Jajpur; no exclusive origin follows. Kahnei remains the name in the quotation, not an identified deity or historical person. Fine soft cloth is explicit; fibre, cost and status-history are not established. Source spelling ପୂରୁବ retained.

An imagined fine shawl and a greeting left unanswered.

Literal meaning

They do not look towards the chronically ill person.

Meaning

The dictionary defines the person in the line as chronically ill. The statement records a harsh lack of attention, but its brief quotation gives no speaker or occasion to tell us whether the neglect was being observed, lamented or defended. Our reading uses it critically: a difficulty that lasts can cease to attract the attention given to a new crisis. That is a way to question neglect, not a reason to accept it or a claim that every family behaves this way.

An example · original

Original imagined example: Friends notice that they stopped calling someone whose illness has lasted many months. One quotes the line as an uncomfortable description of their own neglect and proposes asking what contact the person would welcome.

In context

Historical quotation is not endorsed as care advice. Critical application is explicitly editorial; source supplies chronic illness and lack of attention, not diagnosis, a universal family trait or evidence of the original speaker's intention.

Literal meaning

When the daughter dies, whose relative is the son-in-law?

Meaning

The question presents a relationship as if it depends entirely on the woman through whom it was formed. Her death becomes the point at which the son-in-law's place is questioned. The dictionary explains kinship vocabulary, but supplies no family story or evidence that the question describes a universal custom. Our reading approaches it critically: loss can expose how narrowly people define belonging. It need not settle the answer for a real bereaved family, whose affection and obligations cannot be reduced to this rhetorical line.

An example · original

Original imagined example: In a reading group, someone quotes the line while discussing how kinship is defined. Another reader challenges its implied exclusion, pointing out that shared care can outlast the person who first connected a family. This is an invented discussion, not advice delivered to a bereaved person.

In context

Literal meaning

Friend, preserve your own dignity yourself.

Meaning

The friendly address makes this advice sound like one person speaking directly to another: preserve your dignity through your own conduct. It may counsel restraint when someone is tempted to join a humiliating quarrel or chase approval. It does not make a person responsible for mistreatment inflicted by others.

An example · original

During an argument, a friend is about to answer an insult with another insult. Someone close to them uses the line to encourage a calm withdrawal. (New editorial example, not a collected quotation.)

In context

The contemporary witness begins ଆଲୋ ସଖି. The1893 scan appears to begin ଆରେ ସଖି; that difference is retained as a provisional historical reading. The wording does not establish who first used the saying or confine its advice to one gender.

Literal meaning

Come, bed-wetter, let us sleep. Are you the bed-wetter, or am I? Why wash the mat?

Meaning

The licensed page places this crude joke in the situation of two people sharing the same fault. One possible reading is that their shared embarrassment lets both excuse leaving things as they are. The specific suggestion of mutual indulgence is an editorial interpretation; the witness does not supply a detailed explanation. This bodily image should not be used to shame someone with an actual condition.

An example · original

Two members who both missed a deadline agree not to mention either delay at the meeting. (New editorial example, not a collected quotation.)

In context

The licensed witness has a substantially different word order from the discovery list. Its bodily and gendered forms are retained without smoothing them into that other version. Bed-wetting is a comic image here, not a moral judgment about an actual condition. The figurative explanation is an editorial interpretation, not a separately verified traditional gloss.

Literal meaning

Oil on an already oiled head.

Meaning

The extra oil goes where there is already oil. Used socially, the image questions giving still more attention, help or advantage to someone already well provided for, while others go without. It can sound wry or resentful, depending on who is speaking and how the benefit is being distributed.

An example · original

A well-equipped group receives another set of supplies while a neighbouring group still lacks the basics. Someone uses the saying to question the allocation. (Original editorial example, not a collected quotation.)

In context

The head and oil remain the material image; no named oiling ritual, caste practice or historical incident is implied. The emphasis here is advantage being added to advantage. Other conversational uses, including praise directed at powerful people, need their own context rather than being treated as the only meaning.

Literal meaning

Neither the king’s subject nor the moneylender’s debtor.

Meaning

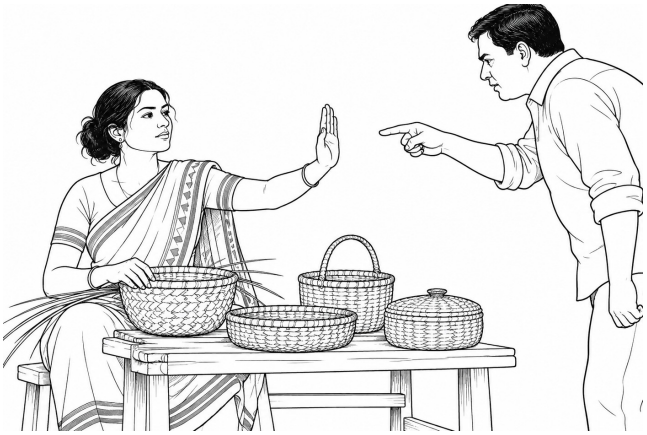
The speaker presents themself as independent and free of debt. It is a forceful refusal to be treated as someone under another’s control.

An example · original

A self-supporting craftsperson rejects a patron’s attempt to dictate a personal decision. (New editorial example, not a collected quotation.)

In context

The dictionary gloss supports independence and absence of debt. This is figurative self-assertion, not a legal exemption from obligations.



Imagined craftsperson: support does not purchase control.

Literal meaning

The kernel of the matter: the crow eats the paddy, but the daughter-in-law is scolded.

Meaning

Blame falls on someone other than the one responsible. The contrast exposes how unfair that is.

An example · original

A shared file disappears because of a system fault, but a new colleague is blamed before anyone checks. (New editorial example, not a collected quotation.)

In context

The household scene names a daughter-in-law as the target of blame. It is not a claim about every family or an endorsement of blaming women.

Literal meaning

I will hurt you through your rice, not with my hand.

Meaning

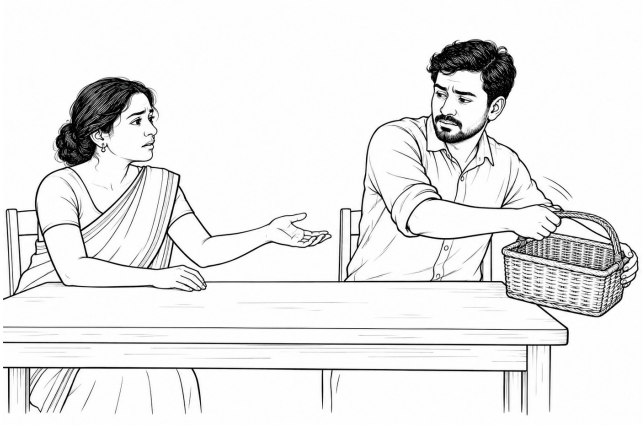
The threat is to deprive someone of food or support rather than strike them. It exposes another form of coercion.

An example · original

Someone withholds promised support to punish disagreement; another person identifies the threat. (New editorial example, not a collected quotation.)

In context

Recorded as a saying, not advice or justification for deprivation.



Imagined withdrawal: withholding support can also be coercion.

Meaning

One person is punished so that someone else takes the warning. The indirect target is the point of the saying.

An example · original

Meaning

The image exposes a benefit obtained by making another bear the loss. The explanation follows the contrast between the creature killed and the one nourished.

An example · original

A manager improves one team’s figures by shifting its unfinished work onto another team. (New editorial example, not a collected quotation.)

In context

Literal meaning

When there is work to be done, a qazi; when the need is over, a scoundrel.

Meaning

The paired words move abruptly from a title of authority to an insult. Read together, they expose respect that depends entirely on another person's usefulness: someone is important while needed and dismissed afterward. The target of this reading is the speaker's opportunism, not the integrity of qazis or any religious community.

An example · original

An organiser repeatedly praises a volunteer while asking for help, then refuses even to acknowledge that help once the event ends. (Original imagined example, not collected testimony.)

In context

The source defines qazi as a Muslim judge and explicitly labels the paired line ଢଗ; a separate lexical entry confirms ପାଜି is an insult. Institutional history in the old dictionary is not adopted as present-day law or status.

Literal meaning

You and I agree—what can the qazi do?

Meaning

The rhyme between raji and qazi turns agreement into a cheeky challenge to an outside authority. The dictionary places it under the qazi's marriage-registration role. Its force is rhetorical: if the people concerned agree, why should someone else obstruct them? That is the speaker's claim, not a statement that consent removes legal duties.

An example · original

Two collaborators agree on a meeting time while an uninvolved acquaintance keeps objecting; one jokingly uses the saying. (Original imagined example, not collected testimony.)

Literal meaning

The horse has no horns; with horns it would spare no one.

Meaning

The image starts with an already powerful animal and imagines giving it another weapon. The collection explains the line as a limit on the strength granted to the strong: with still more power, they might heed nobody. The humour is in the impossible extra equipment, not in a claim that real horses are naturally malicious.

An example · original

A forceful committee member asks to control both the funds and every decision. Another member jokes about adding horns to the horse. (Original imagined example.)

In context

The supplied gloss invokes divine restraint; this is the collection's explanation, not evidence for a particular myth or author. The last clause's omitted object is rendered "no one" in English in line with the gloss's reference to heeding nobody. The opening ଜାଣି does not securely establish who knows or intends this; the English does not turn it into an imperative. Its agency remains unresolved.

Meaning

The source imagines a cat claiming a tiger's stature in a small setting. It mocks someone displaying modest knowledge as great authority where others cannot readily challenge it. The target is inflated self-importance, not the worth of people with less schooling.

An example · original

A novice gives absolute technical advice to beginners, then avoids an experienced person's questions. (Original imagined example.)

In context

Literal meaning

Eat someone's salt; sing that person's merits.

Meaning

Salt stands for livelihood received through service in the dictionary definition. The line links material dependence with praise of the provider. It may express loyalty, or make a sharp comment about praise shaped by dependence; the occasion decides the force. It does not establish that every employee's praise is dishonest or that support requires silence.

Literal meaning

A poor person knows the story of three births.

Meaning

The line sounds like a claim to remarkable knowledge, but the dictionary supplies a harsh explanation. It attributes present poverty to not giving charity in a previous birth, then predicts poverty in the next birth from not giving in the present one. The three births connect alleged past conduct, present hardship and a predicted future; the gloss does not say that the person was poor in the previous birth. This is a recorded belief, not evidence explaining anyone's poverty. Read critically, the saying shows how a neat turn of speech can make blame sound like settled knowledge.

An example · original

In a reading group, someone quotes "ରଙ୍କ ତିନି ଜନମ କଥା ଜାଣେ" and reads the dictionary gloss aloud. Another reader asks, "How could we know someone's past birth—and why should their present hardship be taken as evidence against them?" (Original imagined example, not collected testimony.)

In context

Critical historical documentation, not a recommended reproach to use against poor people. The source gives a karma/charity explanation explicitly; no observed past-life fact, empirical cause of poverty, general Odia belief or present community endorsement is established. The critical reading is Project Odisha's editorial response.

Literal meaning

An elephant passes through, but there is no way for an ant.

Meaning

The impossible difference in scale makes the complaint funny: a passage admits an elephant but somehow cannot admit an ant. The dictionary explains this as overlooking large matters while keeping watch over small ones. The target is misplaced scrutiny, not careful attention itself. In an argument, the image can turn the question back on the person enforcing a tiny rule: what larger thing have they allowed to pass?

An example · original

A committee approves a large unexplained expense, then spends half an hour disputing a tiny stationery claim. A member says, “ହାତୀ ଗଳି ଯାଉଛି ପିମ୍ପୁଡ଼ି ଗଳିବାକୁ ବାଟ ନାହିଁ,” and asks to examine the larger bill first. (Original imagined example, not collected testimony.)

Literal meaning

Being an ant and climbing onto the lampstand.

Meaning

The dictionary applies this small creature and high perch to a “small” person intervening in “big” matters. The wording does more than describe scale: it can dismiss someone’s right to take part by placing them below the subject under discussion. That ranking belongs to the source’s social judgment, not a fact about anyone’s worth or ability. Read critically, the analogy lets us hear how a vivid image can keep a person out of a conversation instead of answering what they said.

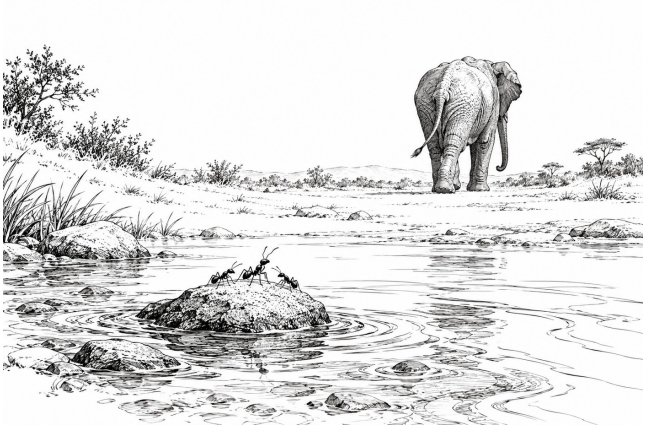
An example · original

At a residents’ meeting, a newcomer questions an expense. Someone dismisses the question with “ପିମ୍ପୁଡ଼ି ହୋଇ ଦୀପରୁଖାରେ ଚଢ଼ିବା.” Another resident replies that the question should be answered, whoever asked it. (Original imagined example, not collected testimony.)

In context

An unnumbered analogy follows note3 and precedes5 in both witnesses; labelled fourth position for this audit only. Source’s ଛୋଟ ଲୋକ is not evidence of a named caste, innate inferiority or lack of ability. Critical reading preserves the dismissive register, not an endorsed lesson to stay in one’s place.

An ant climbing an unlit lampstand.



An indirect illustration of unequal scale: ants on a rock above shallow water, an elephant beyond.

An elephant urinates; ants must swim

Literal meaning

When an elephant urinates, the ants swim.

Meaning

The blunt bodily image makes scale impossible to miss: an ordinary discharge for the elephant becomes a flood for the ants. The dictionary's gloss goes further than the heading's swimming and says the smaller creatures drown. The contrast can picture how a large actor's small action overwhelms those with much less room to absorb it; that application is editorial, rather than a separate use supplied by the dictionary.

An example · original

A large buyer delays payment by a few days, calling it a minor adjustment. A small supplier struggling to pay workers replies with the elephant-and-ant analogy. (Original imagined use, not a collected application.)

In context

Preserve the coarse bodily image and the difference between heading and gloss. This is a recorded analogy, not modern zoological evidence. The business example is newly composed.

Literal meaning

Let the one who has eaten hot rice have pakhala; let the one who has eaten nothing go off to bathe.

Meaning

The people already fed receive another dish, while those who have had nothing are sent away. The dictionary's figurative sense of going to bathe—being deprived of an enjoyment—makes the exclusion explicit. The pairing sounds almost like an orderly instruction, but the distribution it describes is upside down. It can give a speaker a pointed way to expose favouritism: those already served are served again, and unmet need is dismissed. This is an editorial reading of the contrast, not a rule about who deserves food.

An example · original

Original imagined example: A workshop gives extra notebooks to participants who already received supplies, while late arrivals are told there are none for them. One participant quotes the saying to question the arrangement and asks for the remaining notebooks to be shared fairly.

In context

The hot-rice sense of ଟବଟ is independently checked in a second entry of the same dictionary lineage (revision221175), not an independent witness to the saying. Pakhala is retained as the food name. Unlike existing166, this is about unequal allocation and exclusion, not deciding between dishes before asking.

An imagined distribution: more for one, nothing yet for another.

Literal meaning

When they find it soft, they plough it a second time.

Meaning

The source places this line under “soft”, while the linked word dohada means a second tilling. That gives the saying a concrete repeated action: easy ground invites another pass of the plough. An editorial social reading hears a warning about someone taking further advantage when another person yields. It is a possible application of the image, not a separate traditional-use gloss supplied by this entry. The line need not make kindness a fault; the question is whether a concession is being treated as permission to keep pressing.

An example · original

Original imagined example: A colleague agrees to cover one shift. The same coworker then assumes they will cover the following weekend too, without asking. A friend quotes the saying, and the colleague clarifies that the first favour was for one day. This workplace use is editorial, not an attested origin.

In context

199397 establishes second tilling only and is a context-only citation. The social application is explicitly editorial; no agricultural advice, rule about all generous people or documented origin is asserted.

Literal meaning

Who kicks after someone has fallen—may those hands and feet burn.

Meaning

The anger is directed at the person who adds a kick after a fall. The curse gives the protest force: a moment of vulnerability has been used for further harm. We read the line as condemning that cruelty, while preserving its harsh words as the historical quotation rather than a wish to injure someone now. In conversation it can rebuke piling ridicule or blame onto a person already in difficulty. That nonviolent application is editorial; the source's literal image remains a kick.

An example · original

Original imagined example: A team member makes a costly mistake and admits it. When others keep mocking him after the problem is resolved, a colleague quotes the saying to stop the piling-on, not to threaten anyone.

In context

The source labels the headword Sambalpur; this does not establish exclusive origin. Curse retained as quoted rhetoric, not endorsed retaliatory violence. No historical incident or speaker identified.

Literal meaning

If you squeeze a lemon too much, it turns bitter.

Meaning

The useful action—extracting juice—becomes counterproductive when carried too far. The warning is about proportion: pressing for one more favour, one more concession or one more advantage may damage what was already achieved. It does not mean that effort itself is bad.

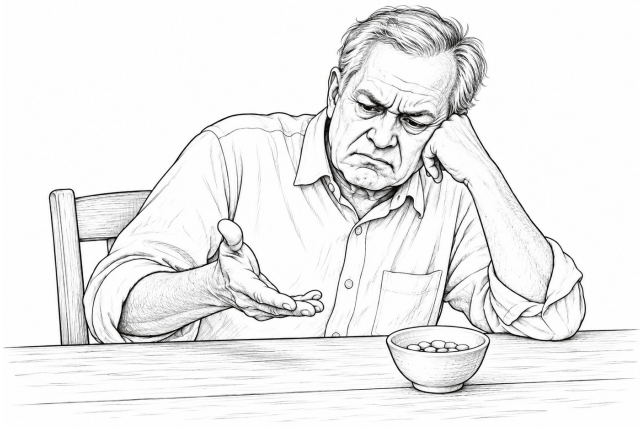
An example · original

After a neighbour has agreed to help for an afternoon, repeatedly asking for more time may invite this saying. (New editorial example, not a collected quotation.)

In context

The image makes a social judgement through an ordinary kitchen action. This reading explains the metaphor; it is not a scientific claim about every citrus fruit or a documented account of how the proverb originated.

Gentle pressure gives juice; pressing the rind too far brings bitterness. An interpretation of the saying.



Frustration turns toward the wrong object.

Literal meaning

Biting the bowl in anger at the medicine.

Meaning

The unpleasant thing is the medicine, but the anger is directed at its container. The expression describes displaced frustration: attacking a messenger, object or bystander instead of addressing the actual problem.

An example · original

A delayed delivery frustrates a customer, who shouts at a neighbour merely passing on the update. Another person uses the saying to identify the misplaced anger. (New editorial example, not a collected quotation.)

In context

The source writes ଔଷଦ and କାମୁଡିବା; this edition preserves those forms rather than silently replacing them with modern spellings. The image explains behaviour and gives no advice about taking medicine.

Literal meaning

Meaning

An action that brings brief relief can deepen the original trouble. In conversation, the expression can describe reopening a minor grievance until it becomes a serious quarrel. The rebuke is directed at aggravating the problem rather than resolving it.

An example · original

A small misunderstanding has been settled, but repeated sarcastic reminders start the argument again. (New editorial example, not a collected quotation.)

In context

Literal meaning

A sore in an awkward place can neither be seen nor shown.

Meaning

The image conveys a predicament that is hard to inspect privately and embarrassing to disclose. In conversation, it can express the burden of a trouble someone feels unable to explain openly. Its force lies in that double bind, rather than in a recommendation to keep suffering secret.

An example · original

A person asked to mediate a dispute between close relatives feels unable to describe either side's private complaints. (New editorial example, not a collected quotation.)

In context

The bodily image is retained in the literal rendering. The figurative explanation is an editorial reading; no medical claim or origin incident is established.

Literal meaning

Whom can one tell? One can only strike a hand against one's forehead.

Meaning

This is a gesture of exasperation put into words. The speaker feels that complaining will find no useful listener, so frustration turns into a weary reaction. It may be rueful or comic; it expresses a feeling of helplessness without proving that help is unavailable.

An example · original

After correcting the same simple mistake several times, a person says this with a tired laugh. (New editorial example, not a collected quotation.)

କର means hand here. The literal gesture helps convey the expression; no physical action is prescribed by the explanation.

Literal meaning

Polish me as much as you like; I remain that half-burnt wood.

Meaning

The speaker declares that repeated efforts to change or improve them will not work. The blunt material image can make the refusal comic, defiant or self-deprecating. It voices a stance in a conversation, not a truth that people cannot learn or change.

An example · original

After repeated advice to adopt a more fashionable manner, someone jokingly insists that they will remain as they are. (New editorial example, not a collected quotation.)

In context

The wood image and the first-person voice are preserved. This is distinct from enduring pressure: here the emphasis falls on resisting another person's attempts to remake the speaker. The source spells the word ଦରପଡ଼ା. "Half-burnt" is an editorial interpretation of that spelling, not a verified correction to the original; lexical and human review remain pending.

Literal meaning

Shake as much as you like; it is enough if I do not budge.

Meaning

The speaker answers pressure with a challenge. Another person may keep trying to unsettle them, but the speaker claims control over their own response. The tone can convey resolve or stubbornness; its value depends on what they are refusing to yield about.

An example · original

Friends tease someone to abandon a carefully considered decision; the reply insists that the teasing will not change it. (New editorial example, not a collected quotation.)

Literal meaning

When milk boils over, it spills onto the hearth; when a person goes too far, into the pit.

Meaning

The first line supplies an everyday overflow; the second turns it into a warning about arrogance. The source explicitly frames the saying as a response to excessive pride. Its sharp downward ending suggests that losing restraint can bring a fall.

An example · original

A successful team member begins dismissing everyone else's advice, and a colleague warns against letting success become arrogance. (New editorial example, not a collected quotation.)

In context

The comparison is between two kinds of overstepping. It is a figurative warning, not a prediction that every proud person will suffer a particular fate. The source's digital punctuation is preserved.

An example · original

After considering several meeting places, the group chooses its usual courtyard again. (New editorial example, not a collected quotation.)

Literal meaning

Let my husband die, so long as the co-wife becomes a widow.

Meaning

Spite becomes so strong that the speaker accepts a shared loss merely to hurt a rival. The deliberately harsh domestic scene exposes the cost of that desire. It is a criticism of destructive resentment, not a claim that women or co-wives naturally behave this way.

An example · original

Two groups refuse a shared resource because each would rather lose access than let the other benefit. (New editorial example, not a collected quotation.)

In context

The source preserves a coarse term for widow and a co-wife rivalry image. Those gendered insults are part of the documented wording, not language the explanation endorses or a history of any particular household. The figurative explanation is an editorial interpretation, not a separately verified traditional gloss.

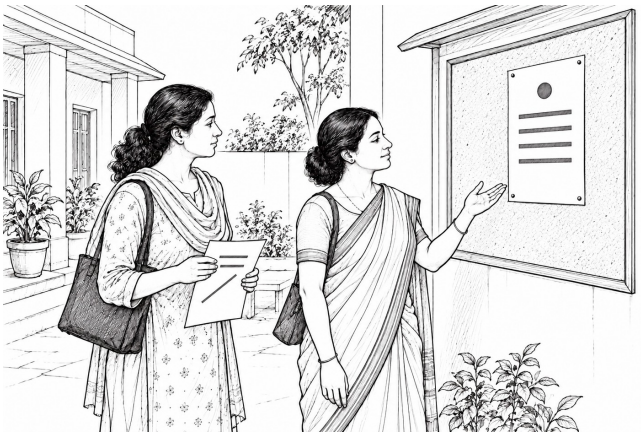
A resigned response when events have become difficult to contain: further words cannot undo what has occurred.

An example · original

After an announcement has already gone out, arguing over the unsent draft no longer changes it. (New editorial example, not a collected quotation.)

In context

The source invokes Radha and a female messenger but names no underlying poem or episode; none is supplied here.



Further words cannot undo what has happened.

Literal meaning

The axle turns, the wheel turns, the earth turns; having made a home in the world, endure even falling stones.

Meaning

The movement of ordinary life leads into counsel to withstand hardship. Endurance is the proposed response to unavoidable jolts.

An example · original

After a storm delays a harvest, a family steadies itself and plans the remaining work. (New editorial example, not a collected quotation.)

In context

Editorial interpretation of an unglossed verse. Endurance does not require accepting abuse or preventable harm.

Literal meaning

Woman with swollen legs, look at your own feet.

Meaning

A sharp retort turns scrutiny back on the critic: examine your own shortcomings before mocking someone else's.

An example · original

Someone criticises a neighbour's untidy records while their own paperwork is in disarray. (New editorial example, not a collected quotation.)

In context

The body-directed insult is part of the historical-style wording, not a recommended way to address illness or disability. Meaning is an editorial reading.

Literal meaning

Near the Ganga and other sacred waters, the chataka remains thirsty, depending on a drop from a cloud.

Meaning

The verse pictures longing fixed on one source despite alternatives nearby. It may evoke steadfast desire; context determines whether that seems admirable or impractical.

An example · original

A musician declines several engagements while waiting for the invitation that matters most to them. (New editorial example, not a collected quotation.)

In context

Literal meaning

They ask for stale rice-water to eat, yet refuse cream and butter when offered.

Meaning

The contrast mocks a refusal that appears at odds with what someone usually seeks. An unsolicited offer is rejected despite being presented as more desirable.

An example · original

Someone repeatedly asks to borrow basic tools but declines a better set freely offered by a neighbour. (New editorial example, not a collected quotation.)

In context

The dictionary explicitly labels this a dhaga under offering something. Rice-water interprets the witness spelling ତୋଡ଼ାଣି without changing it. The saying does not explain why the offer is refused; consent and personal preference remain valid.

What is requested and what is offered do not meet.

Visible fire and private grief are set beside each other as an interpretation of the saying.

Literal meaning

When a forest burns, the world knows; when the heart burns, no one knows.

Meaning

Visible calamity draws attention; private grief can remain unnoticed. The contrast asks the listener to recognise pain that has no outward blaze.

An example · original

A neighbour appears composed at work while privately grieving a loss. (New editorial example, not a collected quotation.)

In context

The dictionary places this under mental distress. “No one” is the saying’s emphatic contrast, not a claim that support is impossible.

Literal meaning

Little sleep, so much happening; fate has made me pine away.

Meaning

A weary complaint that troubles leave little rest. The exaggerated lament carries the feeling of being overwhelmed.

An example · original

After several demanding days, someone sighs that even bedtime brings another worry. (New editorial example, not a collected quotation.)

In context

The dictionary cites this under happening/event. This is an editorial reading of its lament, not sleep advice.

Literal meaning

No lamentation for what has gone.

Meaning

The maxim urges someone to stop dwelling on an irreversible event and attend to what can still be done. It need not mean forgetting lessons or dismissing grief.

An example · original

After missing an application deadline, someone prepares carefully for the next opportunity. (New editorial example, not a collected quotation.)

In context

The dictionary explicitly labels this a Sanskrit proverb recorded in Odia. It is not a rule about how long someone should grieve.

Literal meaning

If it is not in one’s fate, even the ruler does not give it.

Meaning

The saying voices resignation when hoped-for help fails. It expresses a belief about fate, not proof that effort or assistance is useless.

An example · original

A hoped-for recommendation brings no result. (Original editorial example, not a collected quotation.)

In context

The source places this under the fate sense of କପାଳ.

Hoped-for help does not arrive.

Literal meaning

Do not hit me; I am already dead. Light a lamp and look at my back: I have acquired the name of a gourd thief.

Meaning

The dictionary uses this under humiliation: punishment and disgrace have already landed. The protest is not permission for further violence.

An example · original

A fictional speaker protests against being shamed again. (Original editorial example, not a collected quotation.)

In context

No actual theft or punishment incident is verified.

Meaning

The source explains this as intense anger towards someone. Avoiding even their shadow exaggerates how complete that rejection feels.

An example · original

In context

An emotional exaggeration, not a claim about shadows.

Literal meaning

Through excessive pride, Lanka was destroyed.

Meaning

The source invokes Ravana's downfall as an image of destructive pride. It warns against arrogance through a literary-religious allusion, not a verified historical event.

Literal meaning

Providence supports the unprotected.

Meaning

The saying expresses faith that someone without protection may still find help. It offers reassurance, not a reason to withhold practical assistance.

An example · original

Neighbours reassure a stranded traveller while arranging help. (Original editorial example, not a collected quotation.)

In context

A statement of faith, not a guaranteed outcome.

Literal meaning

To stand like a post.

Meaning

Someone remains standing stiffly or motionlessly. In the source's example, the speaker has already invited the person to sit; the comparison conveys impatience, not a diagnosis of the person's motives.

An example · original

After repeatedly offering a chair, a host asks why the visitor is still standing motionless. (Original editorial example, not a collected quotation.)

In context

The source's invitation-to-sit example supports this limited reading; no claim of laziness or incapacity is warranted.

Literal meaning

A dog's tail is crooked.

Meaning

The source uses the curved tail as an image of a persistent disposition. In ordinary conversation it can express frustration when a habit returns; it does not prove that people are incapable of change.

An example · original

Someone repeatedly returns to interrupting others despite promising to listen. (Original editorial example, not a collected quotation.)

In context

The source's fixed-nature gloss is reported as a proverbial attitude, not endorsed as psychology or a judgment on a whole group.

A curved tail becomes an image of habit.

Literal meaning

Hearing the black gram being beaten, horse-gram husk; the pigeon pea says, “Save me, father.”

Meaning

The source explains the fear that spreads when someone sees another in trouble. The pulses speak as if the next blow might reach them too.

An example · original

One shop is penalised for unsafe wiring, and neighbouring owners anxiously inspect their own shops. (Original editorial example, not a collected quotation.)

In context

The first clause is elliptical in the captured wording. It is preserved without supplying a missing verb; the source gloss supports the shared-fear reading.

Literal meaning

In food there is no good or bad: whatever is available in a place.

Meaning

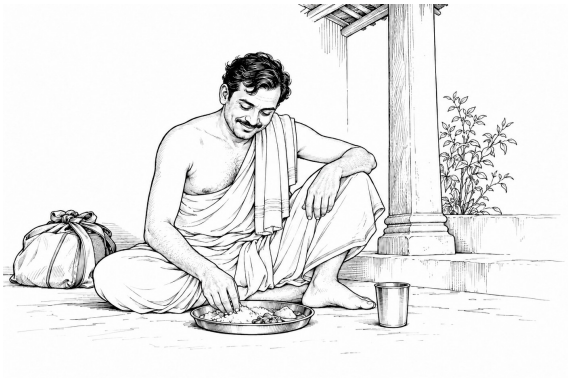
The verse sets aside distinctions between preferred and less preferred food: one accepts what is available. A related passage in Jagannath Das’s Odia Bhagabata places this thought in the Avadhuta’s account to King Yadu of equanimity and the python as a teacher. Read in everyday conversation, it can counsel contentment instead of constant complaint. That everyday application is an interpretation, not an account of the saying’s first use.

An example · original

On a visit, a guest welcomes a simple meal instead of complaining that a favourite dish is missing. (Original imagined occasion.)

In context

The related Bhagabata text is an ascetic teaching about contentment. Its chapter 9, verse 5 reads ଯେମନ୍ତ where the selected Incubator witness reads ଯେବଣ; keep both readings distinct. Neither this comparison nor the modern compilation establishes a first coinage or a direction of borrowing.



A traveller finds contentment in a simple meal.

Literal meaning

If you yourself survive, your father's name lives on.

Meaning

The short line makes survival the condition for carrying a family name forward. The collection's gloss extends the thought towards being able to help the world by first getting oneself ahead. This is a reminder that continuing to live and act matters; it does not establish that another person's welfare is unimportant.

An example · original

Someone carrying out a long family task is exhausted but unwilling to stop. A relative uses the line to urge a pause so the work can continue tomorrow. (Original imagined example.)

In context

The father's name is the source's family image, not a claim that only sons sustain families. English "lives on" supplies the implied continuation rather than an additional historical assertion. No origin story is supplied.

Literal meaning

If Hari protects, who can kill? If Hari kills, who can protect?

Meaning

The mirrored questions express faith in divine authority over life and death. Repeating the same verbs in reverse makes the speaker's conviction sound absolute. It may voice surrender when human control feels limited; that use is an editorial reading, not a documented origin.

An example · original

After an uncertain journey ends safely, a believer expresses gratitude with this saying. (Original imagined example.)

In context

Religious conviction, not a factual prediction or reason to withhold care. Source labels the example Dhaga but supplies no separate situational gloss.

An imagined moment of gratitude after arriving safely.

Literal meaning

The kaunria stick will break; it will not bend.

Meaning

The image makes refusal to yield stark: breaking becomes possible before bending does. Applied to a person, it can sound like admiration for resolve or criticism of costly stubbornness. The words alone do not settle which tone the speaker intends. The object gives that tension a shape without turning every refusal into a virtue.

An example · original

A collaborator refuses even a small scheduling change until a shared project falls through; a disappointed friend repeats the saying. (Original imagined example, not collected testimony.)

In context

Source gives a fibre-stripped plant-stem sense, not an experimentally verified botanical rule. Keep kaunria name without fixing an independently verified species. Dual social readings are editorial.

Literal meaning

A son from a well-fed household, yet eager for food!

Meaning

The teasing surprise lies in the mismatch: food is plentiful at home, yet the child lights up at the sight of something to eat. Here ରଙ୍କ carries eagerness for food, rather than the stinginess it carries in another saying on the same dictionary page. Spoken warmly, the line can notice the temptation of a fresh treat even after a meal; spoken sharply, it can embarrass the child. The joke is about that moment, not proof of a child’s character or whether they are hungry.

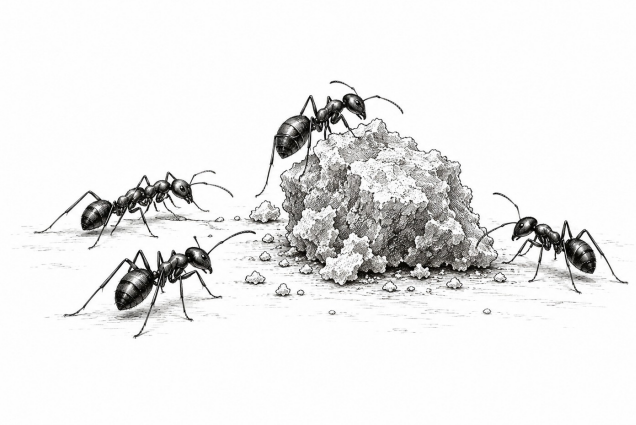
An example · original

After lunch, a child eagerly asks what is in a newly opened snack box. An aunt smiles and says, “ଖାଇଲାଘରର ପୁଅ ରଙ୍କ!” She then asks whether the child would like a little now or later. (Original imagined example, not collected testimony.)

In context

The source explicitly describes children in households where food is not lacking. The affectionate scene and discussion of tone are editorial, not observed testimony. Preserve the source’s son wording without making hunger or eagerness a gendered or innate trait. Distinct from 190’s stinginess and 191’s restricted choice.

A fresh snack catches a child’s attention after a meal.



Drawn towards sweetness.

Literal meaning

The analogy of ants being mad for jaggery.

Meaning

The ants' pull towards sweetness supplies a picture of someone's marked eagerness or greed. The dictionary allows both interest and greed, so the comparison need not carry the same accusation on every occasion. A playful comment about enthusiasm can turn sharp when the attraction is self-serving. The object of desire need not be food.

An example · original

A friend who never misses a book sale is already at the door before it opens. A companion laughs and uses the ants-and-jaggery analogy. (Original imagined use, choosing the source's interest rather than greed sense.)

In context

The dictionary explicitly supplies interest or greed as applications. The new example chooses interest; no origin story, popularity measurement or universal claim about ant behaviour is added.

ଏତେ ଖାଇ ନ ପୂରିଲା ପେଟ ବିରି ଓଳିଆରେ ମାରୁଛ ହାତ

Still reaching for the pulse store

ଏତେ ଖାଇସାରି ମଧ୍ୟ ପେଟ ପୂରିଲା ନାହିଁ, ହାତ ପୁଣି ବିରି ରଖାଥିବା ଓଳିଆ ଆଡ଼କୁ ଯାଉଛି—ଏହି ବଢ଼ିଚାଲିଥିବା ଚାହିଦାରେ କଥାଟିର ଖୋଚା| ଅଭିଧାନରେ ଏହା ଭୋଜନରେ ପେଟ ପୂରିବା ଅର୍ଥର ଉଦାହରଣ| ନିଜ ଭାଗରେ ଯଥେଷ୍ଟ ପାଇସାରି ଆହୁରି ମାଗୁଥିବା ଜଣକୁ ଏହି ଚିତ୍ର ଧରି ଥଟ୍ଟା କରାଯାଇପାରେ; ଏହା ଆମର ପ୍ରୟୋଗମୂଳକ ପାଠ| ହସରେ କୁହାଯାଇଥିବା କଥା ଯେପରି କାହାର ପ୍ରକୃତ ଭୋକ କିମ୍ବା ଶରୀରକୁ ଅପମାନ ନକରେ, ସେଥିରେ କହିବାର ସ୍ୱର ଓ ପରିସ୍ଥିତିର ଫରକ ଅଛି|

Literal meaning

After eating so much, the belly is still not full; you are reaching into the stored black gram.

Meaning

The speaker points out a comic excess: even a substantial meal has not stopped the hand reaching for more. The dictionary places the line under having a full meal; the appetite and the reaching hand are its concrete scene. It can be read as a teasing complaint that someone has already had plenty yet still wants another share. That broader application is an editorial reading, not an additional dictionary gloss. Tone matters: the joke need not be turned into a judgment about a person's body or genuine hunger.

An example · original

Original imagined example: At a drawing club, everyone receives a packet of paper. One member has already taken two spare packets and now reaches for the last one. A friend laughs and quotes the saying, asking them to leave something for the others. The joke concerns their extra share, not their appetite or body.

In context

The food image is retained as a conversational tease. The source supplies the literal full-meal sense, not a general moral definition. The storage object is retained as ଓଳିଆ in Odia; its construction has not been independently established here.

An imagined example: already supplied, yet reaching for another share.
